1 Introduction

The Bank of New York Mellon (BNY Mellon) is a global investments company dedicated to helping its clients manage and service their financial assets throughout the investment lifecycle. Whether providing financial services for institutions, corporations or individual investors, BNY Mellon delivers informed investment management and investment services in 35 countries and more than 100 markets. As at December 31st 2020, BNY Mellon had \$41.1 trillion in assets under custody and/or administration, and \$2.21 trillion in assets under management.

This Pillar 3 disclosure relates to BNY Mellon Investment Management Europe Holdings Limited ('IMEH') – a holding company for BNY Mellon EMEA-based investment management firms - and is published in accordance with the requirements of the Financial Conduct Authority ('FCA') Prudential Sourcebook for Banks, Building Societies and Investment Firms, BIPRU 11 (Pillar 3). Financial Conduct Authority ('FCA') Prudential Sourcebook for Banks, Building Societies and Investment Firms, BIPRU 11 (Pillar 3). Pillar 3 disclosures are made in respect of the consolidation group headed by IMEH.

This disclosure is made annually and all information contained is as at December 31st 2020. The company will reassess the need to publish some or all of the disclosures more frequently than annually in light of any significant change to the relevant characteristics of its business including disclosure about capital resources and adequacy, and information about risk exposure and other items prone to rapid change.

This disclosure was approved for publication by the Board of Directors (hereafter the 'Board') on 09 August 2021 and published on The Bank of New York Mellon Corporation group website (www.bnymellon.com), in the section Investor Relations, Financial Reports, Other Regulatory.

1.1. Purpose of Pillar 3 Disclosure

The EU Capital Requirements Directive (CRD) is the genus of the FCA's prudential rules and establishes a risk sensitive approach to capital management, which is comprised of three pillars:

Pillar 1 - Minimum capital requirement: Establishes rules for the calculation of minimum capital for credit risk, counterparty credit risk, market risk and operational risk and capital resources requirements

Pillar 2 - Supervisory review process: An internal discipline to evaluate the adequacy of the regulatory capital requirement under Pillar 1 and other non-Pillar 1 risks. This pillar requires the FCA to undertake a supervisory review to assess the robustness of IMEH's internal assessment and its capital requirements.

Pillar 3 - Market discipline: complements the other pillars and effects market discipline through public disclosure. Expanded disclosure about capital and risk enables interested parties to gauge the capital adequacy of individual financial institutions.

Wherever possible and relevant, the Board will ensure consistency between Pillar 3 disclosures, Pillar 1 reporting and Pillar 2 ICAAP content e.g., disclosure about risk management practices and capital resources at year-end.

2 Scope of Application

2.1 Company Description

The IMEH group forms the EMEA arm of BNY Mellon's global asset management business. In common with the global strategy, each of the Investment Firms acquired or established operates with a significant degree of operational autonomy. The strategy of the various subsidiaries is decided by the individual Boards. Through the appointment of senior management to the individual Boards, the Group have input into and oversight of the on-going development and assessment of that strategy.

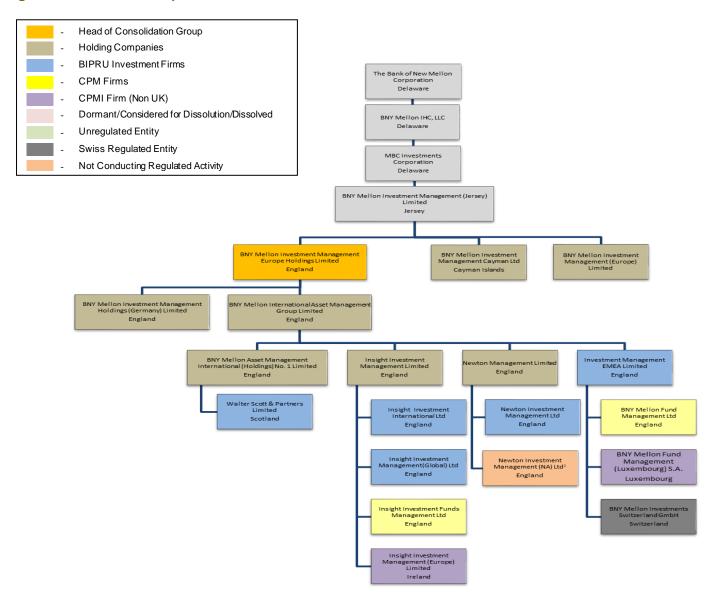

The following regulated entities ('Investment Businesses') are fully consolidated subsidiaries:

BNY Mellon Investment Management EMEA Limited ('IM EMEA')

- BNY Mellon Fund Management Limited
- BNY Mellon Investments Switzerland GmbH
- BNY Mellon Fund Management (Luxembourg) S.A.
- Insight Investment Management Limited, comprising Insight Investment Management (Global) Limited, Insight Investment Funds Management Limited, Insight Investment Management (Europe) Limited and Insight Investment International Limited
- Newton Management Limited, comprising Newton Investment Management Limited and Newton Investment Management (North America) Limited
- Walter Scott & Partners Limited

Figure 1: BNYM IMEH Corporate Structure at 31 December 2020

¹ Newton Investment Management (NA) Ltd transferred all regulated activities and associated risks to Newton Investment Management (NIM) in early 2020. FCA 4A permission removal was completed on 9 June 2020.

3 Risk Management Objectives and Policies

3.1 Risk Management Framework

Each of the Investment Businesses is operated as a discrete entity and the Board and executive team members have a high degree of knowledge about their business and are very close to the day-to-day risk management and other associated issues such as trading, compliance and staff management. The regulated Investment Businesses' Boards have primary responsibility for both the management and the oversight of risks together with the quality and effectiveness of risk management, compliance and regulatory frameworks in their firms. They meet at least on a quarterly basis and consider reports and issues escalated by the delegated groups and committees within their business. In the cases of; IM EMEA, Insight, Newton, BNY Mellon Fund Management Limited, BNY Mellon Fund Management (Luxembourg) S.A and Walter Scott & Partners each has appointed Independent Non-Executive Directors to the Boards of the Regulated entities.

Risk Management culture is centred on the Three Lines of Defence with Risk Management being the second and Internal Audit the third line of defence. Within the Investment Management business, there exists a central BNY Mellon Risk function which works in conjunction with the embedded Risk Managers within the firms. The Investment Management Head of Risk oversees the management of risk through Risk Managers operating within the Investment Businesses.

3.2 Scope and Nature of Risk Reporting Systems

BNYM Investment Management is a global business with global oversight arrangements. The global Investment Management Risk Committee (IMRC) meets monthly in New York. The IMRC is co-chaired by Hanneke Smits (Investment Management CEO) and Nicolas Fries (Investment Management Head of Risk) - and the membership includes representatives from each of the BNYM IM regions. The IMRC is responsible for the management of risk across the entire IM business.

The IMRC has set a risk appetite for the Global Investment Management business and each Investment Business has established its own risk appetite within the overall global tolerance and framework. Risk metrics exist at every level of the stated risk appetite to ensure and report, both at an Investment Business level and globally, that risks are being managed with agreed limits.

All Investment Businesses have a Risk & Compliance Committee. These meet at least quarterly, but in practice tend to be monthly, and commonly comprise internal Risk & Compliance, business line management and Finance as well representatives from central Risk, Compliance, Audit and Legal. Escalation guidelines exist to ensure appropriate escalation. In addition, depending on the size and business activities, some Investment Businesses have senior management, investment, credit and other committees.

Notwithstanding the autonomy and responsibility of the individual Investment Businesses, each of them adopts a common overall risk framework in line with global BNYM policy standards. This helps to ensure thoroughness of risk management activities, consistency of approach, and commonality in escalation to the IMRC. The elements of the risk management framework are:

3.3 Risk Appetite Statement

An overarching Risk Appetite Statement (RAS) has been prepared at the Global Investment Management business level. Each business within the consolidated IMEH Group has and maintains a local RAS including the levels of risk that it has determined it will accept, and how those levels will be monitored and reported. Although each business has the autonomy to propose any level of risk appetite that its Board considers appropriate, any levels of risk which exceed the IM accepted levels of risk require approval by the IMRC.

3.4 Risk and Control Self-Assessment

Each business assesses the risks associated with its key business processes. Detailed process driven risk assessments consider all factors of the operation of each business. Assessments consider the frequency and severity of operational losses, performance of key risk indicators, emerging risks, audit and regulatory findings. In the event a control is deemed as 'Designed Effectively' Operating Ineffectively' or 'Designed Ineffectively' Operating Ineffectively' the risk owner or their

designee documents a description of the Control Gap and Action Plan to mitigate the control inefficiency or a formal Risk Acceptance is sought and documented.

3.5 Key Risk Indicators

Key Risk Indicators (KRIs) are used by business lines to evaluate control effectiveness and residual risk within a business process. Material risks are monitored by appropriate KRIs which relate directly to key risks identified in the RAS. The business lines use the corporate KRI process to monitor changes in the probability of the high risks materialising, and to ensure that appropriate actions are taken. KRIs are reported on a monthly or quarterly basis.

3.6 Operational Risk Events

Significant events of \$10k or greater and all near misses must be recorded on the Risk Management Platform as soon as practicable but not later than within 30 calendar days of detection. Sector Operational Risk Managers may grant an extension at their discretion. Significant Events greater than USD \$50,000 must be elevated and reported to Senior Management within 72 hours of the date of determination and include the best available information at that point in time. A near miss with a notional or transactional value greater than \$10 million should be elevated to Senior Management on the day of detection.

3.7 High Level Assessment

On a quarterly basis a high-level risk assessment (HLA) is carried out at the Investment Management level that covers all the firms in the IMEH Group. HLA provides a qualitative assessment of the inherent risk, quality of control, residual risk and direction of risk for Operational Risk Basel loss type categories and certain sub-type categories.

3.8 Emerging and External Risks

Emerging and External Risks are identified according to the assessment of the inherent risk, quality of controls in place to mitigate risk and likelihood to identify residual risk. Emerging and External Risks are rated as 'High', 'Moderate', and 'Low' with direction anticipated.

3.9 Stress Testing

Stress testing is performed at the IMEH Consolidated level to ensure consistency and is supplemented by Investment Business level stress testing to deal with any idiosyncratic risks. The process reflects stressed scenarios that identify an appropriate range of adverse circumstances of varying nature, severity and duration. Sources of risk information used to assist scenario development include Emerging and External Risk reporting, financial sensitivity analysis, outputs from the risk assessment tools, operational risk trends, macro-economic data, financial news, client management information or general business statistics.

Scenarios are derived from current, emerging, and plausible future risks and strategy, and reviewed, discussed and agreed by IMEH's and Investment Businesses' legal entity boards for Investment Business level tests.

The conclusion of the stress testing process is a statement of the future risk(s) the business faces, control improvements to mitigate the impact should the risk arise and where appropriate, a recommendation for the capital held against each risk type.

4 Key Risk Areas

4.1 Operational Risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, and systems, or from external events (including legal risk but excluding strategic and reputation risk). It may arise from errors in transaction processing, breaches of internal control systems and compliance requirements, internal or external fraud, damage to physical assets, and business disruption due to systems failures, execution, delivery and process management or other events. Operational risk can also arise from potential legal or regulatory actions because of non-compliance with regulatory requirements, prudent ethical standards or contractual obligations, these being sub-classified as compliance risk.

Across the IMEH group the level of operational risk is managed through rigorous operating policies, procedures and controls set by the Investment Businesses' Boards and implemented by Risk Management.

Business Managers in each Investment Business are responsible for Risk Control Self Assessments ("RCSA"), which include identification of the risks associated with key business processes, identifying and measuring the effectiveness of controls in place to manage risk and for remediation of any weakness. RCSAs are reviewed on at least an annual basis by Business Management. The Risk Management teams have an independent oversight role in this process.

Model Risk constitutes an integral part of BNYM risk management framework and is managed at the legal entity level by Business Managers. The Investment Businesses use models as a complement to a qualitative investment or business judgement, or as primary drivers of investment decisions. All models are subject to the BNYM Enterprise Model Risk Management Policy which governs the process of development, approval and validation of models.

The Investment Businesses' Boards monitor operational risks and the appropriateness of controls through the Risk & Compliance Committee and independent reporting from Risk Managers. This requires the Investment Businesses to regularly update their RCSAs, as well as monthly KRIs and prompt reporting of any significant financial impacts as a result of errors.

Risk Management performs monitoring appropriate to the business and identified risks, which includes KRI reporting, significant event analysis and ad hoc reviews. Moreover, the key elements of the RCSA, internal control environment, monitoring and governance arrangements are routinely reviewed and challenged by the Risk & Compliance Committee.

4.2 Market Risk

Market risk is the risk to a firm's financial condition arising as a result of adverse movements in the markets, such as foreign currency exchange rates, interest rates and equity and commodity prices.

None of the IMEH group regulated entities are authorised to trade on their own account or to underwrite issues of financial instruments. Market risk capital arises due to non-trading exposures in non-functional currencies, and when investments in equities and in collective investment undertakings (CIU) are held to launch new products or as investments (e.g. holdings in cash funds). These are accounted for at their market value.

4.3 Interest Rate Risk in Non-Trading Book

Interest Rate Risk (IRR) is the risk associated with changes in interest rates that affect net interest income (NII) from interest-earning assets and interest-paying liabilities. It is a regulatory requirement that interest rate risk is monitored in the trading portfolio and non-trading book separately, the IMEH group does not have a trading portfolio. The IRR exposure in the non-trading book arises from on and off-balance sheet assets and liabilities, and changes with movements in domestic and foreign interest rates.

IMEH group does not have a significant exposure to IRR although it continues to monitor it through the financial control framework which will identify any change in the exposure.

4.4 Credit Risk

Credit risk is the risk of default from counterparties or clients for deposits, loans, commitments, securities and other assets where the realisation of the value of the asset is dependent on its ability to perform.

Assets subject to credit risk for the IMEH group typically comprise deposits with BNY Mellon London Branch, deposits with external banks, investments in money market funds and fee receivables from clients. Cash deposits, typically the Investment Firm's accumulated profits, are held under a variety of arrangements including deposits with BNY Mellon (London Branch). However, each MIFID Investment Firm holds a liquidity buffer equivalent to at least twice the calculated Fixed Overhead Requirements (FOR), calculated under FCA Rules, outside the BNY Mellon Group – insulated from the risk of BNY Mellon failure.

Credit Risk Exposure

The following credit risk exposure tables (1) to (3) summarise the credit exposure for IMEH group by exposure class, credit quality steps, geographic area and residual maturity. All data as at 31 December 2020.

Table 1: Standardised gross credit exposure by exposure class

Exposure Class	Exposure at Default (EAD) pre Credit Risk Mitigation (CRM)		Average EAD	pre CRM	Standardised Credit Risk Capital Requirement

Past-Due Assets and Provisions

As at December 31, 2020, IMEH or any of the underlying Investment Businesses had no material assets past-due greater than 90 days. Neither IMEH nor any of the underlying Investment Businesses incurred any material write-offs of bad debts or make any recovery of amounts previously written off during the year to December 31, 2020.

4.5 Liquidity Risk

Liquidity Risk is the risk that a firm, although solvent, either does not have available sufficient financial resources to enable it to meet its obligations as they fall due or can secure such resources only at excessive cost.

The IMEH group currently has sufficient cash and current assets to meet its liabilities when they fall due; current and projected cash deposits can cover current and long-term liabilities. Management fees provide the major source of funds with payment of staff and administrative expenses being the principal uses of funds. Net operating cash flows are projected to be positive and no financing requirements are anticipated. There is minimal risk to the source and use of the funds as there are no deposit-taking activities or loans to clients, and there are no derivatives or off-balance sheet exposures apart from FX forward contracts or other hedges for risk management purposes. Other exceptional activities such as acquisitions are funded either through existing cash resources or from the BNY Mellon group through debt and/or equity.

4.6 Third Party Risk

Third Party risk is the risk of failure in respect of the provision of services by a third party provider that could potentially damage an entity's operations, or if contracts with any of the third party providers are terminated, that the entity may not be able to find alternative providers on a timely basis or on equivalent terms.

Each Investment Management Business has implemented an outsourcing policy which details certain minimum standards that should be adopted when considering or dealing with a service and/or activity that is outsourced to another legal entity, either within the BNYM Group (inter affiliate) or to an external provider and establishes a framework for evaluating and analysing outsourcing projects.

4.7 Reputational Risk

Reputational risk is the current or prospective risk to earnings and capital arising from adverse perception of the image of the financial institution on the part of customers, counterparties, shareholders, investors or regulators.

In addition to the reputational contagion, reputational risk to the Investment Management brand will present itself as a loss of confidence by its clients. Consistent poor performance over a period of time, operational events that occur without appropriate remedy and are perceived by clients to be systemic weaknesses in controls, or a loss of key investment

managers are all possible reasons for a loss of confidence. It is recognised that IMEH does not conduct any operational activity to generate risks in its own right; therefore, the risk is that such situations could occur within the Investment Businesses.

5 Capital Resources and Requirements

IMEH and its subsidiaries that fall within the scope of BIPRU regime are required to calculate their Pillar 1 capital requirements as larger of Fixed Overhead Requirement (FOR) or the sum of credit and market risk capital resource requirements.

5.1 Available Capital Resources

The following table summarises the capital resources for IMEH as at 31 December 2020.

Table 4: Capital Resources

Capital Resources	IMEH				
(£000s)	2020	2019			
Tier 1 Capital					
Called up Share Capital	2,484,730	2,484,730			
Retained Earnings and Other Reserves	357,505	226,683			
Total Tier 1 Capital	2,842,235	2,711,413			
Deductions from Tier 1 Capital					
Intangible Assets	-1322,617	-1,320,073			
Total Tier 1 Capital After Deductions	1,519,618	1,391,340			
Total Tier 2 Capital	-	-			
Deductions from Total of Tiers 1 and 2 Capital	-	-			
Material Holdings	-	-			
Total Capital Resources	1,519,618	1,391,340			

5.2 Pillar 1 Capital Requirements

IMEH calculates its Pillar 1 capital resource requirements as the larger of Fixed Overhead Requirement (FOR) or the sum of credit risk and market risk capital resource requirements.

The following table details the Pillar 1 capital requirements by exposure class for IMEH as at 31 December 2020.

Table 5: Pillar 1 Capital Requirements by Risk Type

Capital Requirements and Adequacy (£000s)	2020	2019
Credit Risk Capital requirements	67,699	67,717
Counterparty Risk Capital Component	-	461
Market Risk Capital Requirement	12,281	2,777
Total Market Risk and Credit Risk Requirement	79,980	70,954
Fixed Overhead Requirement	110,368	100,067
Pillar 1 Capital Requirement	110,368	100,067
Total Capital Resources	1,519,618	1,391,340
Capital Surplus	1,409,250	1,291,273
Total Capital Resources / Total Pillar 1 Capital Requirements	1377%	1390%

5.3 Pillar 2 Capital Requirements

Pillar 2 Capital Requirements are quantified as part of the Internal Capital Adequacy Assessment Process (ICAAP). The main purpose of Pillar 2 is to identify risks pertinent to IMEH operations not yet covered under Pillar 1 and to determine if it is required to hold any additional capital because of these risks.

The risks assessed under Pillar 2 are credit and market risk, operational risk, interest rate risk, business risk and other risks relevant to balance sheet items. Operational risk capital requirement is derived from a model-based assessment which uses IMEH Investment Businesses' internal loss data supplemented with loss data of other BNYM Investment Businesses and a forward-looking scenario analysis. Given the non-complex nature of IMEH credit and market risk, Pillar 2 requirements are calculated on the same basis as Pillar 1 requirements using the standardised methodology. Business risk is considered by applying a severe market downturn scenario to existing balances and financial forecasts over a five-year period.

In addition, IMEH firms perform an orderly wind-down analysis using a set of commonly agreed assumptions which are applied to all firms within the consolidation group.

The overall internal capital adequacy is determined by taking the highest of Pillar 1, Pillar 2 or orderly wind-down scenario. Where Pillar 2 or orderly wind-down analysis result in a higher capital determination than Pillar 1, IMEH holds additional capital at the consolidated level and at the level of regulated entities forming the IMEH Group.

6 Remuneration Disclosure

6.1 Governance

The governance of remuneration matters for BNY Mellon and its group entities, including BNY Mellon Investment Management Europe Holdings Limited ("IMEH") and its businesses, which is regulated by the Financial Conduct Authority ("FCA"), is overseen by four committees, each with separate responsibilities in respect of remuneration as summarised below:

Human Resources and Compensation Committee of BNY Mellon ("HRCC") is responsible for overseeing BNY Mellon's employee compensation and benefits policies and programmes globally. It reviews and is responsible for the compensation plans, policies and programs in which the senior officers participate and has general oversight for the other incentive, retirement, welfare and equity arrangements for all employees globally. The members of the HRCC are non-executive members of the BNY Mellon's Board of Directors, acting on behalf of the BNY Mellon Board of Directors.

Investment Management Compensation Oversight Committee of BNY Mellon ('IM COC') is responsible for ensuring compensation plans are based on sound risk management, it provides governance and risk oversight and advises the HRCC on any compensation risk issues. The members of the IM COC are senior members of BNY Mellon Investment Management, including the Chief Executive Officer of BNY Mellon Investment Management; Global Head of Human Resources for Investment Management, Employee Relations, and HR Governance & Internal Controls; Head of Governance, BNY Mellon Investment Management; the Chief Financial Officer, BNY Mellon Investment Management; and the Global Head of Compensation, BNY Mellon Investment Management. All new material incentive plans, material changes to existing incentive/sales plans and funding accrual decisions are subject to the review and approval of the CEO and CFO.

Incentive Compensation Review Committee ("ICRC") is the coordinating body of senior executives responsible for the oversight of the process of evaluating and recommending compensation reductions for all employees. These decisions are based on feedback regarding risk, compliance, audit and legal outcomes as well as situations of an employee engaged in fraud or who has directly or indirectly contributed to a financial restatement or other irregularity. The ICRC is a management-level committee that reports its recommendations to the HRCC. Ex ante adjustments are recommended by the employee's management for review and approval by the committee and ex post adjustments are formulated by the committee. The Chief Human Resources Officer chairs the committee supported by the Global Head of Compensation and Benefits. Voting members include the Chief Executive Officer, Chief Risk Officer, Chief Compliance & Ethics Officer, Chief Auditor, Chief Financial Officer and General Counsel.

Investment Business Remuneration Committees have delegated responsibility for remuneration matters from the relevant Boards of businesses within the IMEH group. In consultation with the COC, they are responsible for remuneration

policy decisions and the approval of year-end compensation awards for its respective regulated staff members. This process includes formal input from Risk and Compliance when determining the amount of any variable incentive awards.

6.2 Aligning Pay with Performance

The IMEH businesses align their compensation philosophy with BNY Mellon and offer a total compensation opportunity that supports its values; passion for excellence, integrity, strength in diversity and courage to lead, which pays for performance, both at the individual and entity level. The businesses value individual and team contributions and rewards based on how both contribute to business results. In support of this philosophy, variable compensation is regularly used as a means of recognising performance.

Through the compensation philosophy and principles, the interests of our employees and shareholders are aligned by encouraging actions that contribute to superior financial performance and long-term shareholder value, by rewarding success and by ensuring that incentive compensation arrangements do not encourage employees to take unnecessary or excessive risks that threaten the values of the IMEH businesses and BNY Mellon or benefit individual employees at the expense of shareholders or other stakeholders. The compensation structures are comprised of an appropriate mix of fixed and variable compensation that is paid over time. They aim to ensure that both fixed and variable compensation are consistent with business and market practice, fixed compensation is sufficient to provide for a fully flexible variable compensation program, and variable compensation is in the form of annual and/or long-term incentives, and where appropriate granted over equity to align employee remuneration with that of shareholder growth.

6.3 Fixed Remuneration

Fixed remuneration is composed of (i) salary, and (ii) any additional non-performance related amounts paid as a result of contractual obligations or applicable law, or as a result of market practice,

The fixed remuneration of an employee is determined by the job performed, its level of complexity and responsibility, and the remuneration paid in the market for that type of job. It is set for all staff, at a rate to be at all times sufficient to provide for full flexibility with regard to any variable remuneration element, including zero variable remuneration.

Employees who have accepted to be a director of another of BNY Mellon's legal entities are not remunerated in their capacity as a director. Independent directors of BNY Mellon only receive fixed remuneration, as disclosed in the annual Proxy Statement to shareholders.

6.4 Ratio between Fixed and Variable Pay

The IMEH group is supervised on a consolidated basis by the FCA and complies with all applicable remuneration requirements. The MIFID Investment Firms within the IMEH group are all within the scope of the BIPRU Remuneration Code. As such they apply the provisions of the BIPRU Remuneration Code in line with the guidance on proportionality applicable under the FCA's SYSC 19C rule book. BNYM Fund Management (Luxembourg) SA is covered by the UCITS and AIFMD regulations as implemented by the CSSF. BNYM Fund Management Ltd is a FCA regulated 'Common Portfolio Management' firm and is therefore covered by the UCITS and AIFMD regulations as implemented by the FCA through its SYSC 19B and SYSC 19E rule books.

6.5 Variable Compensation Funding and Risk Adjustment

IMEH staff are eligible to be awarded variable compensation but have no entitlement to such awards which are discretionary in nature.

In general the total compensation pool for each of the IMEH businesses, including any variable incentive pool, is based on the profitability of the business with the potential for adjustment by BNY Mellon and the IM COC on the basis of a number of factors including risk management.

Typically the pools are determined primarily based on pre-tax income, which is a profit based rather than revenue based measure. These pools are subject to discretionary adjustment by BNY Mellon and the IM COC and HRCC based on factors in assessing the earnings including (but not limited to) significant non-recurring activity, market conditions, interest and currency rates.

The incentive pools for business partner groups which support the IMEH businesses are based on a management approved fixed pool adjusted by a number of factors, including corporate performance and risk management.

Variable compensation may consist of both upfront cash and deferred components and is determined by the functional hierarchy of the business or function to which the individual staff member belongs, and in accordance with the terms and conditions of the incentive compensation plan that is applicable for the business or business partner service.

The deferred component is intended to align a portion of the variable compensation award with the management of longer-term business risk. The deferred compensation component is generally awarded in the form of either BNY Mellon restricted stock units, deferred cash award invested in an appropriate vehicle, IMEH business equity or any combination determined appropriate from time to time.

To ensure effective risk adjustment, BNY Mellon requires employees who receive variable remuneration awards (both upfront and deferred) to agree to forfeiture and clawback of such awards in the event of fraud, misconduct or actions contributing to the detriment of business interests, including competing with the business and soliciting employees or clients. Where required by regulations, awards to Code Staff¹ are subject to more stringent risk adjustment, including, but not limited to, forfeiture and clawback in the event of employee misbehaviour, material error, material downturn in business unit performance or a material failure of risk management.

6.6 Deferral Policy and Vesting Criteria

For more senior-level employees, a portion of variable compensation will be deferred, under ordinary circumstances for a period of at least three years (albeit such compensation may be deferred on a pro-rata basis for alternative periods), and will be subject to the performance of either (or both) BNY Mellon or the respective business. The deferred component of the variable compensation award is usually delivered as either deferred cash award invested in an appropriate vehicle, IMEH business equity or any combination determined appropriate from time to time. The proportion of the variable compensation award to be deferred depends on the level of the position, regulatory requirements and the amount of the award.

6.7 Variable Remuneration of Control Function Staff

The variable compensation awarded to control function staff (for example; audit, compliance and risk) is dependent on performance that is assessed according to the achievement of objectives specific to their functional role that are independent of the activities they oversee. Remuneration is benchmarked against the market level and funded independently of individual business line and adjusted based on BNY Mellon's overall annual financial performance.

6.8 Quantitative Disclosures

The tables below provide details of the aggregate remuneration of senior management and Code Staff for the IMEH group for the year ended 31 December 2020.

For completeness, this group of staff is limited to those identified as Code Staff. The remuneration amounts are presented on a gross basis, regardless of the time spent by BNY Mellon staff in respect of the IMEH businesses to reflect the full reporting period.

¹ an employee, as identified under the BIPRU Remuneration Code, whose professional activities have a material impact on the firm's risk profile, including but not limited to senior management, risk-takers and staff engaged in control functions.

Table 6: Aggregate Remuneration Expenditure for Code Staff in 2020 by Business

This table shows the total aggregate remuneration expenditure for Code Staff by business for 2020.

		IMEH	
	Investment Management	Other	Total
Total remuneration (£000s)	107,900	-	107,900

Includes base salary and other cash allowances, plus any incentive awarded for full year 2020. Pension contribution is not included. Includes all support functions and general management positions

Table 7: Aggregate Remuneration Expenditure for Code Staff by Remuneration Type

This table shows the aggregate remuneration expenditure for Code Staff by remuneration type.

		Investment Management	
	Senior management	Other Code Staff	Total
Number of beneficiaries	31	73	104
Aggregate fixed remuneration (£000s)	7,444	11,996	19,439
Total variable remuneration (£000s)	52,867	35,594	88,461
Variable cash (£000s)	29,357	20,973	50,330
Variable shares (£000s)	23,510	14,621	38,131
Total deferred remuneration awarded during the financial year (£000s)	23,510	14,621	38,131
Total deferred remuneration paid out during the financial year (£000s)	5,581	1,739	7,320
Total deferred remuneration reduced through performance adjustments (£000s)	-	-	-

Senior management is comprised of MRTs categorised as 'Senior Managers' who carry out a senior management function as determined by the relevant regulators Fixed remuneration includes base salary and any cash allowances. Pension contribution is not included

Table 8: Total Deferred Variable Remuneration for Code Staff Outstanding from Previous Years

This table shows the total deferred remuneration for Code Staff outstanding from previous years.

		Investment Management	
	Senior management	Other Code Staff	Total
Number of beneficiaries	31	62	93
Total deferred variable remuneration outstanding from previous years (£000s)	38,562	45,884	84,445
Total vested (£000s)	6,308	17,261	23,569
Total unvested (£000s)	32,253	28,623	60,876

Table 9: New Sign-on and Severance Payments

This table shows the number and value of new sign-on and severance payments made during 2020.

	IMEH			
	Senior management	Other Code Staff	Total	
Number of sign-on payments awarded	-	-	-	
Value of sign-on payments awarded £000s)	-	-	-	
Number of severance payments awarded	-	-	-	
Value of severance payments awarded (£000s)	-	-	-	
Highest individual severance payment awarded (£000s)	-	-	-	

Table 10: Number of Individuals being Remunerated EUR 1 million or more

This table shows the number of individuals being remunerated €1m or more.

Number of individuals being remunerated ≥ EUR 1m	IMEH
EUR 1m - EUR 1.5m	12
EUR 1.5m - EUR 2m	3
EUR 2m - EUR 2.5m	1
EUR 3m – EUR 3.5m	1
EUR 4m – EUR 4.5m	1
EUR 6.5m – EUR 7m	1
EUR 8m – EUR 8.5m	1
EUR 11m – EUR 11.5m	1
