## **BNY MELLON REPORTS FOURTH QUARTER EARNINGS OF \$505 MILLION OR \$0.42 PER SHARE INCLUDING:**

- **RESTRUCTURING CHARGES RELATED TO EFFICIENCY INITIATIVES OF \$0.06 PER SHARE**
- **NONINTEREST EXPENSES INCREASED 2% COMPARED WITH THIRD QUARTER 2011**
  - **DECREASED 3% EXCLUDING RESTRUCTURING CHARGES AND M&I EXPENSES**
- **GENERATED \$571 MILLION OF BASEL I TIER 1 COMMON EQUITY IN FOURTH QUARTER 2011**
  - **BASEL I TIER 1 COMMON EQUITY RATIO 13.4%, UP 90 BASIS POINTS SEQUENTIALLY**
  - **RETURN ON TANGIBLE COMMON EQUITY 20% EXCLUDING RESTRUCTURING CHARGES AND M&I EXPENSES**
- **ESTIMATED BASEL III TIER 1 COMMON EQUITY RATIO 7.1%, UP 60 BASIS POINTS SEQUENTIALLY**

**NEW YORK, Jan. 18, 2012 --** The Bank of New York Mellon Corporation (“BNY Mellon”) (NYSE:BK) today reported fourth quarter net income applicable to common shareholders of \$505 million, or \$0.42 per common share, compared with \$679 million, or \$0.54 per common share, in the fourth quarter of 2010 and \$651 million, or \$0.53 per common share, in the third quarter of 2011.

“I am pleased with the meaningful progress we made in improving our capital position and reducing operating expenses. Our Basel III Tier 1 common equity ratio was 7.1% at the end of the quarter, and we continued to generate strong returns on tangible common equity. It was a challenging revenue quarter, as general uncertainty in the financial markets resulted in lower-than-normal levels of client activity. Our results were also impacted by seasonality in our Depository Receipts business. We remained focused on driving our operational excellence initiatives and managing our expense base lower to offset weak market conditions,” said Gerald L. Hassell, chairman, president and chief executive officer of BNY Mellon.

“I want to thank our 49,000 professionals across the company for their continued commitment to improve our results and help our clients succeed in a difficult global economy,” said Mr. Hassell.

Net income applicable to common shareholders totaled \$2.516 billion, or \$2.03 per common share, for the full-year 2011 compared with \$2.518 billion, or \$2.05 per common share, for the full-year 2010.

---

Note: See Supplemental information regarding Non-GAAP measures on pages 9 through 13 for the Tier 1 common equity generated in 4Q11, the Basel I Tier 1 common equity ratio, the estimated Basel III Tier 1 common equity ratio and return on tangible common equity excluding restructuring charges and M&I expenses.

**Fourth Quarter Results** - Unless otherwise noted, all comments begin with the results of the fourth quarter of 2011 and are compared to the fourth quarter of 2010. The fourth quarter 2010 information is reported on a continuing operations basis and sequential growth rates are unannualized. Please refer to the Quarterly Earnings Review for a detailed review of our businesses.

## Total revenue

Reconciliation of total revenue (dollars in millions)	4Q11	3Q11	4Q10	4Q11 vs.

Net interest revenue – GAAP	780	775	720	8%	1%
Total revenue excluding net securities gains (losses) – Non-GAAP	\$ 3,571	\$ 3,683	\$ 3,736	(4)%	(3)%
Total revenue – GAAP	\$ 3,540	\$ 3,694	\$ 3,751	(6)%	(4)%

(a) See the Supplemental information section beginning on page 9.

- **Assets under custody and administration** amounted to \$25.8 trillion at Dec. 31, 2011, an increase of 3% compared with the prior year and flat sequentially. The increase compared with Dec. 31, 2010 was driven by net new business. **Assets under management**, excluding securities lending assets, amounted to \$1.26 trillion at Dec. 31, 2011. This represents an increase of 8% compared with the prior year and 5% sequentially. The year-over-year increase primarily reflects net new business. On a sequential basis, the increase resulted from higher equity markets and net new business. Long-term inflows totaled \$16 billion and short-term inflows totaled \$7 billion. Long-term inflows benefited from fixed income and equity indexed products.
- **Investment services fees** totaled \$1.6 billion, a decrease of 8% year-over-year and 12% sequentially. Both decreases were primarily driven by seasonally lower Depository Receipts revenue, lower volumes and higher money market fee waivers. Adjusted for the seasonal impact of Depository Receipts revenue, investment services fees decreased 3% both year-over-year and sequentially.
- **Investment management and performance fees** were \$730 million, a decrease of 9% year-over-year and flat sequentially. The year-over-year decrease was driven by higher money market fee waivers, lower performance fees and weaker international equity markets, partially offset by net new business. Sequentially, higher performance fees and net new business were offset by lower revenue on equity investments and higher money market fee waivers.
- **Foreign exchange and other trading revenue** totaled \$228 million compared with \$258 million in the fourth quarter of 2010 and \$200 million in the third quarter of 2011. In the fourth quarter of 2011, foreign exchange revenue totaled \$183 million, a decrease of 11% year-over-year and 17% sequentially. Both decreases resulted from lower volumes. The year-over-year decrease was partially offset by higher volatility, while sequentially, volatility decreased. Other trading revenue was \$45 million in the fourth quarter of 2011 compared with revenue of \$52 million in the fourth quarter of 2010 and a loss of \$21 million in the third quarter of 2011. The sequential increase was primarily driven by a lower credit valuation adjustment.
- **Investment and other income** totaled \$146 million compared with \$80 million in the prior year period and \$83 million in the third quarter of 2011. The increases compared with both prior periods primarily resulted from a pre-tax gain of \$98 million (after-tax gain of \$4 million) on the sale of the Shareowner Services business, partially offset by a \$30 million write-down of an equity investment.

- **Net interest revenue** and the **net interest margin (FTE)** were \$780 million and 1.27% compared with \$775 million and 1.30% sequentially. The changes in net interest revenue and the net interest margin (FTE) were primarily driven by growth in client deposits which were placed with central banks. Average noninterest-bearing client deposits increased \$3 billion, or 4%, compared with the third quarter of 2011.

The **provision for credit losses** was \$23 million in the fourth quarter of 2011 compared with a credit of \$22 million in both the fourth quarter of 2010 and the third quarter of 2011. The provision in the fourth quarter of 2011 primarily resulted from a broker-dealer customer that filed for bankruptcy in the fourth quarter of 2011.

### Total noninterest expense

Reconciliation of noninterest expense (dollar amounts in millions)	4Q11	3Q11	4Q10	4Q11 vs.	
				4Q10	3Q11
Noninterest expense – GAAP	\$ 2,828	\$ 2,771	\$2,803	1%	2%
Less: Restructuring charges	107	(5)	21		
M&I expenses	32	17	43		
Total noninterest expense excluding restructuring charges and M&I expenses – Non-GAAP	2,689	2,759	2,739	(2)	(3)
Less: Amortization of intangible assets	106	106	115		
Total noninterest expense excluding restructuring charges, M&I expenses and amortization of intangible assets – Non-GAAP	\$ 2,583	\$ 2,653	\$ 2,624	(2)%	(3)%

- Total **noninterest expense** (excluding restructuring charges, merger and integration (“M&I”) expenses and amortization of intangible assets) (Non-GAAP) decreased 2% compared with the prior year period and 3% sequentially. The year-over-year decrease reflects lower staff expense partially offset by higher litigation expense. The sequential decrease primarily resulted from lower staff expense reflecting lower incentive expense and a decline in headcount, as well as lower litigation expense and lower volume-driven expenses, partially offset by higher software and equipment, business development and professional, legal and other purchased services expenses.
  - The fourth quarter of 2011 results include a restructuring charge of \$107 million, or \$0.06 per diluted common share related to efficiency initiatives to transform operations, technology and corporate services.

The **effective tax rate** was 30.6% in the fourth quarter of 2011, compared with 27.3% on a continuing operations basis in the fourth quarter of 2010, and 29.7% in the third quarter of 2011. The effective tax rate in the fourth quarter of 2011 was negatively impacted by non-tax deductible goodwill associated with the disposition of Shareowner Services which was largely offset by a more favorable mix of foreign and domestic income.

The **unrealized net of tax gain on our total investment securities portfolio** was \$420 million at Dec. 31, 2011 compared with \$461 million at Sept. 30, 2011. The decrease in the valuation of the investment securities portfolio was driven by a lower valuation of non-agency residential mortgage-backed securities.

(a) Preliminary.

(b) Our estimated Basel III Tier 1 common equity ratio (Non-GAAP) reflects our current interpretation of the Basel III rules. Our estimated Basel III Tier 1 common equity ratio could change in the future as the U.S. regulatory agencies implement Basel III or if our businesses change.

(c) See the Supplemental information section beginning on page 9 for a calculation of these ratios.

N/A – Not applicable.

We generated \$571 million of Basel I Tier 1 common equity in the fourth quarter of 2011, primarily driven by earnings retention.

Our estimated Basel III Tier 1 common equity ratio (Non-GAAP) was 7.1% at Dec. 31, 2011 compared with 6.5% at Sept. 30, 2011. The improvement in the ratio was driven by lower risk-weighted assets and a reduction in goodwill and intangible assets.

**Quarterly dividend** – On Jan. 18, 2012, The Bank of New York Mellon Corporation declared a quarterly common stock dividend of \$0.13 per common share. This cash dividend is payable on Feb. 7, 2012 to shareholders of record as of the close of business on Jan. 30, 2012.

## **Supplemental information – Explanation of Non-GAAP financial measures**

BNY Mellon has included in this press release certain Non-GAAP financial measures based upon tangible common shareholders' equity. BNY Mellon believes that the ratio of Tier 1 common equity to risk-weighted assets and the ratio of tangible common shareholders' equity to tangible assets of operations are measures of capital strength that provide additional useful information to investors, supplementing the Tier 1 and Total capital ratios which are utilized by regulatory authorities. The ratio of Tier 1 common equity to risk-weighted assets excludes trust preferred securities, which will be phased out as Tier 1 regulatory capital beginning in 2013. Unlike the Tier 1 and Total capital ratios, the tangible common shareholders' equity ratio fully incorporates those changes in investment securities valuations which are reflected in total shareholders' equity. In addition, this ratio is expressed as a percentage of the actual book value of assets, as opposed to a percentage of a risk-based reduced value established in accordance with regulatory requirements, although BNY Mellon in its calculation has excluded certain assets which are given a zero percent risk-weighting for regulatory purposes. Further, BNY Mellon believes that the return on tangible common equity measure, which excludes goodwill and intangible assets net of deferred tax liabilities, is a useful additional measure for investors because it presents a measure of BNY Mellon's performance in reference to those assets which are productive in generating income. BNY Mellon has presented its estimated Basel III Tier 1 common equity ratio on a basis that is representative of how it currently understands the Basel III rules. Management views the Basel III Tier 1 common equity ratio as a key measure in monitoring BNY Mellon's capital position. Additionally, the presentation of the Basel III Tier 1 common equity ratio allows investors to compare BNY Mellon's Basel III Tier 1 common equity ratio with estimates presented by other companies.

BNY Mellon has provided a measure of tangible book value per share, which it believes provides additional useful information as to the level of such assets in relation to shares of common stock outstanding. BNY Mellon has presented revenue measures which exclude the effect of net securities gains (losses); and expense measures which exclude special litigation reserves taken in the first quarter of 2010, restructuring charges, M&I expenses and amortization of intangible assets expenses. Operating margin measures, which exclude some or all of these items, are also presented. Operating margin measures also exclude noncontrolling interests related to consolidated investment management funds. BNY Mellon believes that these measures are useful to investors because they permit a focus on period to period comparisons which relate to the ability of BNY Mellon to enhance revenues and limit expenses in circumstances where such matters are within BNY Mellon's control. The excluded items in general relate to situations where accounting rules require certain ongoing charges as a result of prior transactions, or where we have incurred charges unrelated to operational initiatives. M&I expenses primarily relate to the acquisitions of Global Investment Servicing on July 1, 2010 and BHF Asset Servicing GmbH on Aug. 2, 2010 and the merger with Mellon Financial Corporation in 2007. M&I expenses generally continue for approximately three years after the transaction and can vary on a year-to-year basis depending on the stage of the integration. BNY Mellon believes that the exclusion of M&I expenses provides investors with a focus on BNY Mellon's business as it would appear on a consolidated going-forward basis, after such M&I expenses have ceased, typically after approximately three years. Future periods will not reflect such M&I expenses, and thus may be more easily compared to our current results if M&I expenses are excluded. With regards to the exclusion of net securities gains (losses), BNY Mellon's primary businesses are Investment Management and Investment Services. The management of these businesses is evaluated on the basis of the ability of these businesses to generate fee and net interest revenue and to control expenses, and not on the results of BNY Mellon's investment securities portfolio. The investment securities portfolio is managed within the Other segment. The primary objective of the investment securities portfolio is to generate net interest revenue from the liquidity generated by BNY Mellon's processing businesses. BNY Mellon does not generally originate or trade the securities in the investment securities portfolio.

The presentation of financial measures excluding special litigation reserves taken in the first quarter of 2010 provides investors the ability to view performance metrics on the basis that management views results. The presentation of income of consolidated investment management funds, net of noncontrolling interest related to the consolidation of certain investment management funds, permits investors to view revenue on a basis consistent with how management views the business. Restructuring charges relate to our operational efficiency initiatives and migrating positions to global growth centers. Excluding these charges permits investors to view expenses on

a basis consistent with how management views the business. BNY Mellon believes that these presentations, as a supplement to GAAP information, give investors a clearer picture of the results of its primary businesses.

In this Earnings Release, the net interest margin is presented on an FTE basis. We believe that this presentation provides comparability of amounts arising from both taxable and tax exempt sources, and is consistent with industry practice.

Each of these measures as described above is used by management to monitor financial performance, both on a company-wide and business-level basis.

(a) *Our estimated Basel III Tier 1 common equity ratio (Non-GAAP) reflects our current interpretation of the Basel III rules. Our estimated Basel III Tier 1 common equity ratio could change in the near future as the U.S. regulatory agencies implement Basel III or if our businesses change.*

(b) *Preliminary.*

(c) *Basel III does not add back to capital the adjustment to other comprehensive income that Basel I and Basel II make for pension liabilities and available-for-sale securities. Also, under Basel III, pension assets recorded on the balance sheet and adjustments related to equity method investments are a deduction from capital.*

(d) *Primary differences between Basel I and Basel III include: the determination of credit risk under Basel I uses predetermined risk weights and asset classes, while under Basel III includes borrower credit ratings and internal risk models; the treatment of securitizations that fall below investment grade receive a significantly higher risk weighting under Basel III than Basel I; also, Basel III includes additional adjustments for operational risk, market risk, counter party credit risk and equity exposures.*
