1 Article 431 CRR - Scope of disclosure requirements

1.1 Disclosure policy

These Pillar 3 disclosures are published for Pershing Holdings (UK) Limited (together the 'PHUK Group' or 'Pershing') in accordance with the Capital Requirements Directive¹ ('CRD IV') and the Capital Requirements Regulation² ('CRR'), complementing the annual disclosures of the financial statements.

These disclosures cover the the PHUK Group and its subsidiary undertakings as at 31 December 2021.

These disclosures were approved by PHUK Group's Board of Directors (the 'Board') on 1 June 2022. The Board approved the adequacy of PHUK Group's risk management arrangements, providing assurance that the risk management systems put in place are adequate with regard to PHUK Group's profile and strategy.

Effective as of 1 January 2022 the Company will publish its periodic public disclosures in accordance with the requirements of the Investment Firms Prudential Regime³ ('IFPR') issued by the Financial Conduct Authority ('FCA'). The first reporting date under this framework will be 31 December 2022.

³ IFPR Prudential Disclosure Rules and Guidance: https://www.fca.org.uk/firms/investment-firms-prudential-regime-ifpr

Executive summary Pillar 3 Disclosure 2021 · 4

¹ Directive 2019/878/EU and of the Council of 20 May 2019, amending Directive 2013/36/EU as regards exempted entities, financial holding companies, mixed financial holding companies, remuneration, supervisory measures and powers and capital conservation measures.

² Regulation (EU) No 2019/876 on prudential requirements for credit institutions and investment firms amending Regulation (EU) No 575/2013, 20 May 2019.

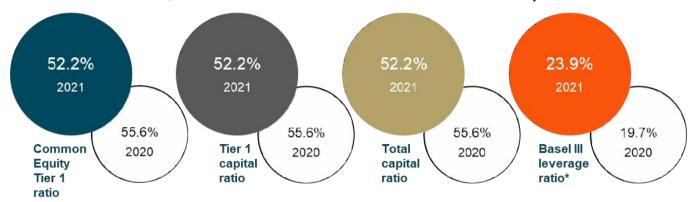

Pillar 3 disclosures are required for a consolidated group and for those parts of the group covered by CRD IV. When assessing the appropriateness of these disclosures in the application of Article 431(3) of the CRR, PHUK Group has ensured adherence to the following principles of:

The Basel Committee on Banking Supervision ('BCBS') requires these disclosures to be published at the highest level of consolidation. PHUK Group has adopted this approach with information presented at a fully consolidated level.

Information in this report has been prepared solely to meet Pillar 3 disclosure requirements of the entity noted, and to provide certain specified information about capital, risk, details about the management of those risks, and for no other purpose. These disclosures do not constitute any form of financial statement of the business nor do they constitute any form of contemporary or forward looking record or opinion about the business.

Unless indicated otherwise, information contained within this document has not been subject to external audit.

^{*} This ratio is for information only. PHUK Group is not subject to a binding leverage requirement.

CET1 ratio = CET1 capital / Pillar 1 RWAs

Tier 1 ratio = Tier 1 capital / Pillar 1 RWAs

Total capital ratio = Total capital / Pillar 1 RWAs

Leverage ratio = Tier 1 capital / Leverage exposure measure

1.2 The Basel III framework

Basel III is the international banking accord intended to strengthen the measurement and monitoring of financial institutions' capital. The Basel III framework was transposed in the EU regulations through CRR and has established a more risk-sensitive approach to capital management. It is comprised of three pillars:

Pillar 1 - Minimum capital requirement:

Establishes rules for the calculation of minimum capital for credit risk, counterparty credit risk, market risk, operational risk and capital resources requirements.

Pillar 2 - Supervisory review process:

Requires firms and supervisors to undertake an internal capital adequacy assessment process to determine whether the financial institution needs to hold additional capital against risks not adequately covered in Pillar 1 and to take action accordingly.

Pillar 3 - Market discipline:

Complements the other two pillars and effects market discipline through public disclosure showing an institution's risk management policies, approach to capital management, capital resources and an analysis of its credit risk exposures.

Wherever possible and relevant, the Board will ensure consistency between Pillar 3 disclosures, Pillar 1 reporting and Pillar 2 content.

1.3 Purpose of Pillar 3

Pillar 3 requires the external publication of exposures and, where applicable, the associated risk-weighted assets and the Pillar 1 capital requirements for the following:

These Pillar 3 disclosures only focus on those risk and exposure types in accordance with Part 8 of CRR at the reporting date.

PHUK Group includes both quantitative and qualitative disclosures to show the relevant information and describe its approach to capital management, its capital resources and an analysis of its risk exposures. The disclosures also include, where appropriate, comparative figures for the prior year and an analysis of the more significant movements to provide greater insight into its approach to risk management.

For completeness, selected other risks that PHUK Group is exposed to, but which are not covered above, are discussed in Appendix 1.

1.4 Article 432 CRR - Non-material, proprietary or confidential information

In accordance with CRD IV, the Board may omit one or more disclosures if the information provided is not regarded as material. The criterion for materiality used in these disclosures is that the PHUK Group will regard any information where omission or misstatement could change or influence the assessment or decision of a user relying on that information for the purpose of making economic decisions.

Furthermore, the Board may omit one or more disclosures if the information provided is regarded as proprietary or confidential. Information is regarded as proprietary if disclosing it publicly would undermine the competitive position of a company. It may include information on products or systems which, if shared with competitors, would render an institution's investment therein less valuable. In such circumstance, the Board will state in its disclosures the fact that specific items of information are not disclosed and the reason for non-disclosure. In addition it will publish more general information about the subject matter of the disclosure requirement except where this is classified as confidential.

PHUK Group undertakes no obligation to revise or to update any forward-looking or other statement contained within this report regardless of whether or not those statements are affected as a result of new information or future events.

1.5 Article 433/434 CRR - Frequency and means of disclosure

Disclosure will be made annually based on calendar year-end and will be published in conjunction with the date of publication of the Financial Statements. PHUK Group will reassess the need to publish some or all of the disclosures more frequently than annually in light of any significant change to the relevant characteristics of its business including disclosure about capital resources and adequacy, and information about risk exposure and other items prone to rapid change.

Effective as of 1 January 2022 the Company will continue to publish its periodic public disclosures annually, in accordance with the requirements of IFPR.

Disclosures are published on both The Bank of New York Mellon Corporation and Pershing's corporate websites which can be accessed using the links below:

BNY Mellon Investor Relations - Pillar 3 (See the Additional Country Disclosures section).

Pershing Group

Executive summary Pillar 3 Disclosure 2021 · 6

1.6 Key 2021 and subsequent events

PHUK Group acts as a holding company and there are no plans to change the nature of activities in the future.

During 2022, the PHUK Group will continue to execute its primary business of providing financial services firms with a comprehensive range of products and services based around its traditional business model of execution and post trade services. The PHUK Group will continue to invest in its infrastructure and identify centres of efficiency in order to improve upon its financial position. The directors will continue to seek opportunities to develop the PHUK Group's business ensuring that the wider stakeholder group continues to be appropriately involved and informed.

Regulatory Change

The PHUK Group has prepared for IFPR to replace CRD IV from January 2022. IFPR is more suited to investment firms and calibrated in a manner proportionate to the best interests of clients and the promotion of the smooth and orderly functioning of the markets. These disclosures will be the final iteration under the existing CRR framework.

Geopolitical and other macro-environmental risks

The PHUK Group is exposed to geopolitical risks associated with political instability, terrorists acts, military conflicts, civil unrests and tensions between countries, which could impact its clients and cause disruption to business operations. In addition, epidemic and pandemic outbreaks are becoming more frequent and severe, and these could cause severe economic impacts on business sectors, economies and societies.

The COVID-19 pandemic continues to remain dynamic and has led to a continued level of uncertainty. To ensure the health and wellbeing of its people and continuing ability to service its clients, the wider BNY Mellon Group moved to a largely working-from-home model during 2020 and 2021, during which period the Company and the BNY Mellon Group implemented enhanced monitoring and oversight controls. A conservative and measured approach continues to be adopted whilst the BNY Mellon Group's employees return to office as the COVID-19 pandemic subsides. Additionally, the US, the UK and the EU have imposed sanctions and threatened to expand them significantly against Russia in response to an increasing risk with its conflict with Ukraine which, together with any military conflict, could impact global markets. Management continues to monitor developments and seek to manage the associated impacts on customers, service delivery and business operations throughout the PHUK Group's operating subsidiaries.

Streamlined Energy and Carbon Reporting ("SECR")

In accordance with the Companies Regulations 2018, the Company is in scope as a large unquoted entity and therefore required to report its energy use and associated greenhouse gas ('GHG') emissions resulting from energy use and employees' business travel.

However, the PHUK Group qualifies as a low energy user as defined by the regulation and accordingly has no requirement to make the detailed disclosures for its energy and carbon information.

Financial statement consideration

Particular focus has been on PHUK Group's key areas of significant judgment and estimation uncertainty, specifically provisions.

- During the year, the PHUK Group had an increase in revenue primarily driven by an increase in assets under custody indicating that the pandemic has had no adverse impact on the level of assets administered by the PHUK Group;
- the PHUK Group continues to closely monitor the impact of market volatility on its balance sheet and currently has sufficient liquidity in excess of its regulatory requirement. The PHUK Group continues to monitor the risk of Central Bank interest rate movements; and,
- no provisions have arisen as a result of management's actions specifically in response to the impact of pandemic.

Executive summary Pillar 3 Disclosure 2021 · 7

PHUK Group's operational resilience

Management has assessed the impact of COVID-19 on PHUK Group's existing operational processes and its potential impact on its key stakeholders.

- customers: There has been no significant interruptions on customer related processes and activities. The PHUK Group has continued to administer services to its customers;
- suppliers: Through the PHUK Group's proactive outreach programme to its third party providers, management has continued to assess and monitor its contractual risk resulting from the COVID-19 pandemic. No significant issues have been noted to-date;
- the PHUK Group is adequately financed and is able to utilise existing cash flows within the group in the event that additional capital is needed. As at 31 December 2021, the PHUK Group had sufficient headroom above regulatory capital requirements; and,
- the PHUK Group's key information technology systems and infrastructure including those outsourced have not been significantly impacted as a result of COVID-19 and continue to operate as normal.

The Board is closely monitoring and managing the COVID-19 situation and believes that the fundamentals underpinning PHUK Group's strategy remain intact.

The PHUK Group continues to carefully monitor and mitigate the risk on an ongoing basis in order to minimise exposure while maintaining a robust balance sheet and sufficient headroom above regulatory capital requirements.

1.7 Key metrics

The following metrics reflect PHUK Group's risk profile:

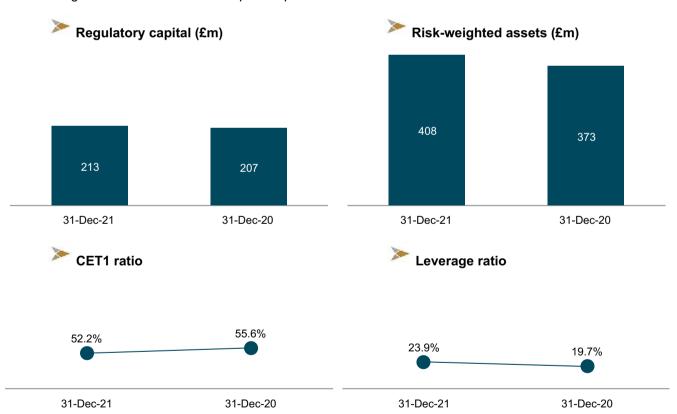

Table 1: KM1 - Key metrics

(£m)	31-Dec-21	31-Dec-20
Available capital (£m)		
Common Equity Tier 1 ('CET1') capital	213.2	207.2
Tier 1 capital	213.2	207.2
Total capital	213.2	207.2
Risk-weighted assets (£m)		
Total risk-weighted assets ('RWA')	408.1	372.5
Risk-based capital ratios as a percentage of RWA		
CET1 ratio	52.2 %	55.6 %
Tier 1 ratio	52.2 %	55.6 %
Total capital ratio	52.2 %	55.6 %
Capital conservation buffer requirement	2.50 %	2.50 %
Countercyclical buffer requirement	— %	— %
Total of CET1 specific buffer requirements	2.50 %	2.50 %
Leverage ratio		
Total leverage ratio exposure measure (£m)	890.5	1,051.6
Leverage ratio	23.9 %	19.7 %

1.8 Article 436 CRR - Scope of application

PHUK Group is a holding company for a group of subsidiaries which provide a full range of execution, middle-office and post-trade services, investment administration, Self-Invested Personal Pension ('SIPP') operation services and related services. PHUK Group is incorporated in the UK and is an operationally independent subsidiary of Pershing Group LLC which is, in turn a subsidiary of the Bank of New York Mellon Corporation ('BNY Mellon').

Pershing Group LLC is engaged in broadly the same business activity as PHUK Group. As at 31 December 2021, Pershing Group LLC had approximately \$2 trillion in assets under administration / custody.

BNY Mellon is a global investments company dedicated to helping its clients manage and service their financial assets throughout the investment lifecycle. Whether providing financial services for institutions, corporations or individual investors, BNY Mellon delivers informed investment management and investment services in 35 countries and more than 100 markets. As of 31 December 2021, BNY Mellon had \$46.7 trillion in assets under custody and/or administration, and \$2.4 trillion in assets under management. BNY Mellon can act as a single point of contact for clients looking to create, trade, hold, manage, service, distribute or restructure investments. BNY Mellon is the corporate brand of The Bank of New York Mellon Corporation (NYSE: BK). Additional information is available on www.bnymellon.com. Follow us on Twitter @BNYMellon or visit our newsroom at www.bnymellon.com/newsroom for the latest company news.

Pershing Limited ('PL') and Pershing Securities Limited ('PSL') are significant subsidiaries of PHUK Group. The capital resources and requirements of PL and PSL are disclosed in Appendix 3.

Pershing (Channel Islands) Limited ('PCI') is regulated by the Jersey Financial Securities Commission. Pershing Securities International Limited ('PSIL') is regulated by the Central Bank of Ireland whose standalone Pillar 3 disclosures are prepared in accordance with the Investment Firms Regulation ('IFR') and published separately.

The legal entity structure of PHUK Group is illustrated in Figure 1 on the following page.

Figure 1: PHUK Group legal entity structure at 31 December 2021

Basis of consolidation

Entity name	Consolidation basis	Services provided	Governing law (regulator)
Pershing Holdings (UK) limited ('PHUK')	Fully consolidated	Consolidated entity - PHUK is a holding company for a group of subsidiaries which provide a full range of execution, middle-office and post-trade services, investment administration, Self-Invested Personal Pension ('SIPP') operation services and related services.	England & Wales
Pershing Limited ('PL')	Fully consolidated	Subsidiary - PL provides a full range of execution, middle-office and post-trade services, investment administration, SIPP (Self-Invested Personal Pension) operation services and related services.	England & Wales ('FCA')
Pershing Securities Limited ('PSL')	Fully consolidated	Subsidiary - PSL provides a full range of execution, middle-office and post-trade services, investment administration, SIPP (Self-Invested Personal Pension) operation services and related services.	England & Wales ('FCA')
Pershing (Channel Islands) Limited ('PCI')	Fully consolidated	Subsidiary - PCI's principal activity is the provision of middle-office, post-trade services, investment administration and related services.	Channel Islands ('JFSC')
Pershing Securities International Limited ('PSIL')	Fully consolidated	Subsidiary - PSIL's principal activities are the provision of middle-office and post-trade services, investment administration and related services.	Republic of Ireland ('CBI')

Executive summary Pillar 3 Disclosure 2021 · 10

1.9 Core business lines

The principal activities of the PHUK Group include the provision of an integrated range of execution, clearing and settlement, investment administration, safe custody and related services for a range of broker-dealers, wealth managers, intermediary firms and financial institutions. These are further described below:

Clearing and Settlement Services

PHUK Group provides clearing and settlement services of on-exchange and over-the-counter ('OTC') global equity, electronic funds transfer ('EFT'), fund, bond and fixed income trades across more than 40 markets.

Custody Services

PHUK Group offers non-disclosed and fully disclosed custody services both inside and outside the UK.

With a non-disclosed solution, PHUK Group is not disclosed to the end investor and the client uses its own name and balance sheet to support transactions, recording the associated capital and liquidity requirements.

With a fully disclosed solution, PHUK Group is disclosed to the end investor as the custodian of the investor's assets. Any associated trade and settlement risk, related regulatory obligations, capital and asset liquidity requirements, transfer from the client to PHUK Group. PHUK Group also takes responsibility for custody operations (such as dividend entitlement and corporate event notification) and regulatory reporting. In addition to a custody service in the UK, PHUK Group also offers offshore custody through PCI. Custody in Europe, outside the UK, is provided through PSIL in Dublin.

Trading Services

Pershing Trading Services is an agency only model available in the following asset classes: funds, global equities, ETFs, bonds, fixed income and currencies. The service includes electronic equities trading, advanced algorithmic technology and best of breed smart order routing technologies.

Investment and Platform Solutions

PHUK Group provides wealth managers and advisers with a wide range of services, tools and tax-efficient products.

2 Article 437 CRR - Own funds

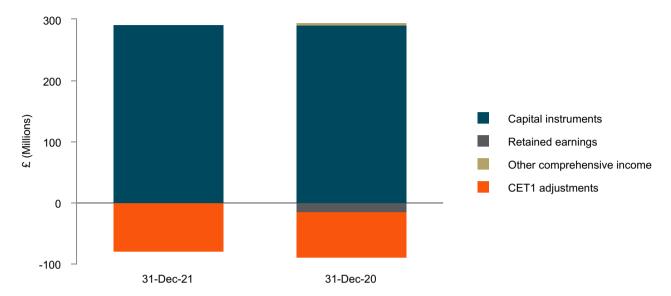

A

Composition of regulatory capital

This graph shows the composition of regulatory capital including all regulatory adjustments (see Table 5: CC1 - Composition of regulatory capital).

This section provides an overview of the regulatory balance sheet and composition of PHUK Group's regulatory capital. There are a number of differences between the balance sheet prepared in accordance with International Financial Reporting Standards ('IFRS') and Pillar 3 disclosures published in accordance with prudential requirements.

Own funds comprise tier 1 and tier 2 capital less deductions.

PHUK Group holds no Additional Tier 1 capital or Tier 2 capital. Accordingly the analysis of those line items has not been shown.

Similar tables for the significant subsidiaries PSL and PL are shown in Appendix 3.

Table 2: CC2 - Reconciliation of regulatory capital

This table shows a reconciliation of PHUK Group's balance sheet prepared in accordance with UK Accounting Standards and applicable law (UK Generally Accepted Accounting Practice), including Financial Reporting Standard 101: Reduced Disclosure Framework ('FRS 101') and the regulatory balance sheet prepared under prudential rules. The regulatory balance sheet forms the basis for the calculation of regulatory capital requirements. There is no difference in the regulatory and accounting scope of consolidation.

Combined buffer requirement	2.50 %
of which: capital conservation buffer requirement	2.50 %
CET1 available to meet buffers (as a percentage of risk exposure amount)	34.0 %
Amounts below the thresholds for deduction (before risk-weighting)	
Deferred tax assets arising from temporary differences (amount below 10% threshold, net of related tax liability where the conditions in Article 38 (3) are met)	1.2

Table 7: CCA - Main features of regulatory capital instruments

This table provides a description of the main features of regulatory instruments issued and included as tier 1 capital in Table 2.

Capital instruments main features (1)	At 31 December 2021
Issuer	Pershing Holdings (UK) Limited
Governing law(s) of the instrument	Law of England and Wales
Regulatory treatment	
Capital classification	Common Equity Tier 1
Level	Not applicable
Instrument type	Ordinary shares
Amount recognised in regulatory capital	£291.1m
Issue price	£1
Accounting classification	Shareholders' equity
Original date of issuance	1 April 2013
Perpetual or dated	No maturity
Coupons / dividends	
Fixed or floating dividend	Fully discretionary
Other pertinent information	None

¹ This table is based on Annex II of ITS Regulation (EU) No. 1423/2013. Selected lines which are not applicable to PHUK Group have not been disclosed.

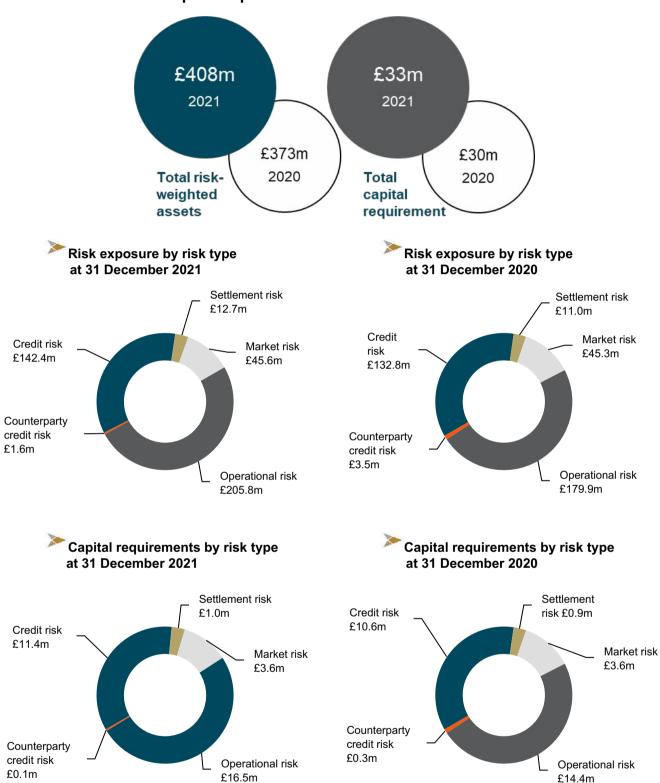

Capital and reserves

	2021	2020
Allotted, called up and fully paid	£000	£000£
291,135,619 ordinary shares of £1 each	291,136	291,136

The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the Company.

3 Article 438 CRR - Capital requirements

Note: All stated risk exposures and their associated capital requirements are derived using the Standardised Approach.

3.1 Calculating capital requirements

The PHUK Group defines the risks that the PHUK Group is exposed to, and sets out the associated capital plan which aims to ensure that the PHUK Group holds an appropriate amount of capital to support its business model, through the economic cycle and given a range of plausible but severe stress scenarios.

CRD IV allows for different approaches for calculating capital requirements. The standardised approach is used for calculating the risk-weights assigned to each risk component including credit risk, counterparty credit risk, market risk and operational risk.

Table 8: EU OV1 - Overview of RWAs

This table shows the risk-weighted assets using the standardised approach and their respective capital requirements. Significant subsidiaries, PSL and PL, are shown in Appendix 3.

	Risk ex	posure amount	Capital requirements		
Type of risk (£m)	31-Dec-21	31-Dec-20	2.8 11.4 3.5 0.1 1.0 1.0 5.3 3.6 5.3 3.6 9.9 16.5 9.9 16.5	31-Dec-20	
Credit risk	142.4	132.8	11.4	10.6	
Counterparty credit risk	1.6	3.5	0.1	0.3	
Settlement risk	12.7	11.0	1.0	0.9	
Market risk	45.6	45.3	3.6	3.6	
of which: Foreign exchange position risk	45.6	45.3	3.6	3.6	
Operational risk	205.8	179.9	16.5	14.4	
of which: Standardised approach	205.8	179.9	16.5	14.4	
Credit valuation adjustment	_	_	_	_	
Total	408.1	372.5	32.6	29.8	
Total capital			213.2	207.2	
Surplus capital			180.6	177.4	

Note: All stated risk exposures and their associated capital requirements are derived using the Standardised Approach.

PHUK Group met or exceeded the minimum capital ratios required to maintain a well-capitalised status and to ensure compliance with regulatory requirements at all times. PHUK Group sets internal capital target levels higher than the minimum regulatory requirements to ensure there is a buffer which reflects balance sheet volatility. These ratios have been determined to be appropriate, sustainable and consistent with the capital objectives, business model, risk appetite and capital plan.

Risk

4 Article 435 CRR - Risk management objectives and policies

Risk statement

PHUK Group adopts a prudent approach to all elements of risk to which it is exposed. It is risk averse by nature and manages its business activities in a manner consistent with the tolerances and limits defined within its risk appetite quantitative and qualitative measures.

PHUK Group seeks to manage risk through a collection of complementary processes and methodologies, designed to enable risks to be consistently identified, measured, managed and ultimately reported through its governance structure.

Clients and other market participants need to have confidence that PHUK Group and its subsidiaries will remain strong and continue to deliver operational excellence and minimise disruption throughout market cycles and especially during periods of market turbulence. PHUK Group is committed to maintaining a strong balance sheet and this philosophy is also consistent with Pershing Group LLC and BNY Mellon as a whole.

4.1 Board of Directors

The Board is the senior strategic and decision making body and consists of representatives of BNY Mellon and senior PHUK Group management. There are two independent non-executive directors on the Boards of Pershing Holdings (UK) Limited, PL, PSL, and PSIL.

The Board has overall responsibility for the establishment and maintenance of PHUK Group's risk appetite framework and for the approval of the risk appetite statement. The Board ensures that strategic business plans are consistent with the approved risk appetite.

The Board is also responsible for both the management and the oversight of risks, together with the quality and effectiveness of internal controls, but delegates risk management oversight to the PHUK Group Executive Committee, supported by the risk management committees. It is also responsible for reviewing, challenging and approving all risk management processes including risk identification and assessment, stress testing and capital adequacy. The various control functions provide further support for the management of risk within the business.

The Board meets at least quarterly and the table below shows the members of the Board and its committees as of 31 December 2021:

Board member	Function at PHUK Group	Name of the other company in which an external function is exercised	Location (country)	Type of activities	Listed company (Y/N)	External mandate (title)	Capital connection with PHUK (Y/N)
E Canning	Chief Operating Officer, Pershing Interim Chief Executive Officer	Providence Row	United Kingdom	Social work activities, housing	N	Chair of the Trustees	N
L Dobson	Chief Financial Officer, Pershing						
		Kerry Group plc	Ireland	Food service organisation	Υ	Independent Non- Executive Director	N
E Gilvarry Independent Non-	Greencoat plc	Ireland	Investment Company in renewable energy	Υ	Senior Independent Director	N	
	Independent Non- Executive Director	Innovu Limited	Ireland	Acquisition and consolidation activities	N	Chair	N
		Ireland West Airport	Ireland	Regional Airports	N	Board member	N
		Board of Ireland Funds	Ireland	Philanthropic investment in projects in Ireland	N	Board member	N
		Victoria House Foundation	Ireland	Library	N	Chair	N
J Jack	Group Non-Executive Director	The St Giles Christian Mission	United Kingdom	Religious organisation	N	Director	N
M McPhail Exe	Independent Non- Executive Director and	Medical and Dental Defence Union of Scotland	United Kingdom	Professional indemnity and medical/dental legal advice	N	Non-Executive Director	N
	Chair PL, PSL and PHUK Boards	MDDUS Services Limited	United Kingdom	Professional indemnity and medical/dental legal advice	N	Non-Executive Director	N

Note: G Towers resigned from the Board on 28 May 2021.

PHUK Group has established a Diversity Policy, which sets out its approach to promoting diversity on the PHUK Group Boards.

PHUK Group has a commitment to diversity and inclusion. This commitment is not only important to PHUK Group's culture and to each director as individuals, it is also critical to PHUK Group's ability to serve its clients and grow its business. PHUK Group recognises the benefits of having individuals with diverse backgrounds, experience and viewpoints on the Board for the different perspective and unique contributions they provide. Board appointments are based on an individual's knowledge, skills, experience, performance, and other valid role-related requirements. PHUK Group has set targets to increase female representation at both senior management level and in mid-level leadership with a target date of 31 December 2023.

The Nomination Committee ('NomCo') is responsible for reviewing the structure, size and composition of the Boards of PHUK, PSL and PL, including their skills, knowledge, experience, and diversity, and making recommendations to these Boards with respect to any appointment. In identifying suitable candidates for a particular appointment, the NomCo considers candidates on merit and against objective criteria and with due regard for the benefits of diversity on these Boards, including gender.

4.2 Risk committees

The PHUK Group Executive Committee delegates specific responsibilities to various committees and councils to provide an appropriate oversight and direction to various risk and regulatory processes and activities, including:

Pershing Risk Committee ('PRC') provides a senior management oversight to the overall risk framework and identified risk types that could potentially impact PHUK Group. The PRC reports to the PHUK Group Executive Committee and forms a central point for the oversight and management of risk and the escalation of significant risk issues and events to PHUK Group senior management, PHUK Group Executive Committee and the PHUK Group Boards. Subsidiary risk committees and councils report to the PRC to ensure a consistent and effective reporting of risks and these include the Credit and Market Risk Committee, the Business Acceptance Committee and Asset and Liability Committee. The PRC is co-chaired by the Chief Risk Officer and Interim Chief Executive Officer.

Credit and Market Risk Committee oversees the review of all credit and market risk issues associated with and impacting on business undertaken by PHUK Group. The committee's principal credit risk responsibility is to achieve and maintain an acceptable credit exposure to PHUK Group's clients, as well as to market makers, custodians and banks. It is chaired by the head of Credit and Market Risk.

Asset and Liability Committee ('ALCO') is responsible for overseeing the asset and liability management activities of the balance sheets of PHUK Group and for ensuring compliance with all treasury related regulatory requirements.

ALCO is also responsible for ensuring that the policy and guidance set through the BNY Mellon's Global ALCO and EMEA ALCO is understood and executed locally. This includes the strategy related to the investment portfolio, placements, interest rate risk, capital management and liquidity risk. It is chaired by the Chief Financial Officer and Treasurer.

Business Acceptance Committee ('BAC') is an integral part of the new business process and is responsible for the review and approval of all new clients, products/services and material changes to existing processes before they are executed or implemented and includes responsibility for the pricing of new and existing client activity, products and services. The BAC is chaired by the Chief Information Officer and includes representatives of all of the risk and control functions, as well as line support functions.

Irish Compliance, Risk and Oversight Committee oversees the adherence of PSIL to applicable Irish laws, guidelines and notices effecting its operations and to fulfill the requirements of the Standards for Stockbrokers, as issued by the Central Bank of Ireland ('CBI').

Jersey Compliance and Oversight Council oversees the adherence of Pershing (Channel Islands) Limited to applicable Jersey laws, guidelines and notices effecting its operations and to fulfil the requirements of the investment firms, as issued by the Jersey Financial Services Commission ('JFSC').

4.3 Risk management framework

Suitable policies and procedures have been adopted by PHUK Group in order to ensure an appropriate level of risk management is directed at the relevant element of the business. In line with global policy, PHUK Group has adopted the 'Three Lines of Defence' model in deploying its risk management framework represented in figure 2

Figure 2: Managing Three Lines of Defense

THREE LINES OF DEFENSE

1st Senior Management, Businesses and Corporate Staff

- · Execute business activities consistent with the Company's strategy and risk tolerance
- · Provide information to senior management regarding the current and future risk profile
- · Ensure that the internal control system is designed properly and operating effectively
- · Identify, measure and manage current and emerging risks
- · Operate within the risk appetite, and escalate appropriately
- · Establish policies and procedures that ensure accountability

2nd Risk Management and Compliance

- · Maintain an independent risk management function that is appropriate for the size, complexity and risk profile of the Company
- · Establish enterprise-wide risk limits consistent with the Company's risk tolerance and monitor adherence to such limits
- · Independently challenge and measure the Company's risks, and provide an assessment of the Company's risk profile
- · Provide the Board and senior management with risk reports
- · Identify a system of internal controls and evaluate their effectiveness

3rd Internal Audit

- · Examine, evaluate and perform independent assessments of the Company's risk management and internal controls system
- · Report findings to senior management and the Company's Audit Committee

4.4 Risk appetite

Risk is inherent in all of PHUK Group business activities and it is important that the Board establishes an acceptable risk profile and set limits on the level and nature of the risk that PHUK Group is willing to assume in achieving its strategic objectives and business plans. The Risk Appetite Statement serves this purpose and guides decision making processes, including the manner by which PHUK Group pursues its business strategy and the method by which it manages risk and determines whether its risk position is within the risk appetite.

4.5 Stress testing

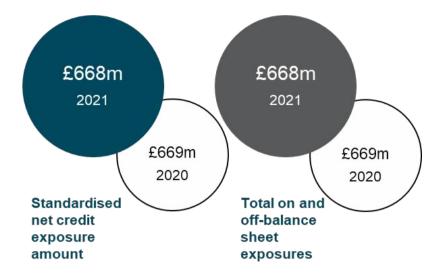

Capital Stress testing is undertaken at PHUK Group to monitor and quantify risk exposures and capital requirements to ascertain whether or not there are sufficient capital resources on a forward-looking basis. The process involves developing stressed scenarios that identify an appropriate range of adverse circumstances of varying nature, severity and duration relevant to PHUK Group's risk profile and business activities. Scenarios are derived from current, emerging, and plausible future risks and strategy, and reviewed, discussed and agreed by PHUK Group PRC, the Executive Committee and the Board.

4.6 Recovery and resolution planning ('RRP')

PHUK Group updates its recovery plan annually, in accordance with regulatory guidance. The recovery plan is designed to ensure that the PHUK Group has credible and executable options to meet the challenges that may arise from potential future financial and/or operational crises.

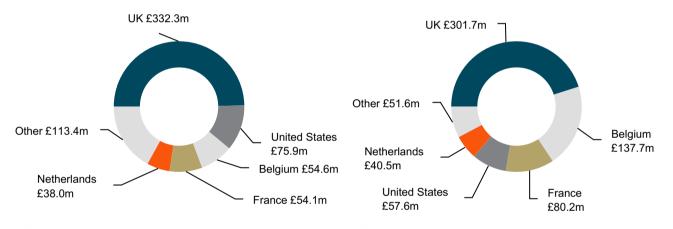

5 Article 442 CRR - Credit risk adjustments

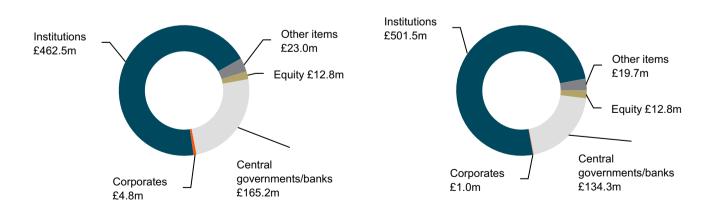

Standardised net credit exposure by country at 31 December 2021

Standardised net credit exposure by country at 31 December 2020

Standardised net credit exposure by counterparty at 31 December 2021

Standardised net credit exposure by counterparty at 31 December 2020

5.1 Definition and identification

Credit risk is the risk of loss in the event that a client, underlying investor or counterparty fails to meet its contractual obligations to the PHUK Group.

Due to the nature of PHUK Group's business as a provider of clearing and settlement services, credit risk mainly arises from the risk of loss in the event that a client, underlying investor or market counterparty fails to meet its contractual obligations to pay for a trade, or to deliver securities for sale.

5.2 Management of credit risk

PHUK Group manages credit risk exposure as follows:

- 1. Setting minimum thresholds for the type of client acceptable to PHUK Group in terms of net worth and business profile, including:
 - the type of business to be conducted through PHUK Group (e.g. retail vs. institutional; agency/matched principal vs. proprietary trading / market-making);
 - markets and financial instruments in which the client can trade; and
 - any special conditions clients are subject to (e.g. cash on account).

Obtaining credit approval for a particular client is the primary responsibility of the business as the first line of defence alongside guidance and oversight from Credit Risk as the second line. Any new relationship requires approval from the BAC.

- 2. Monitoring all exposures (both pre- and post-settlement) on a daily basis against various limits for its clients, as follows:
 - trade limit (set per client following analysis of the financial strength, management expertise, nature of business and expected - or historical - peak and average exposure levels);
 - gross exposure limit (calculated with reference to the security deposit and net worth of the client and utilised as the higher of total purchases or total sales); and
 - negative mark-to-market exposures.

Breaches are reported to senior management which may lead to management action such as requesting additional collateral, or requiring the client to inject additional capital into the business.

5.3 Analysis of credit risk

PHUK Group's minimum credit risk capital requirement is calculated using the standardised approach and is expressed as 8% of risk-weighted exposures. Where available, issuer ratings from External Credit Ratings Assessment Institutions ('ECAI') are used in the determination of the relevant risk-weighting across all exposure classes. Where ECAI ratings differ, the more conservative rating is applied.

A breakdown of PHUK Group's credit risk exposures as at 31 December 2021 is provided below.

The definitions below are used in the following tables:

- Exposure at Default ('EAD') is defined as the amount expected to be outstanding, after any Credit Risk Mitigation, if and when a counterparty defaults. Exposure reflects drawn balances as well as allowance for undrawn amounts of commitments and contingent exposures over a one-year time horizon. As such, exposure in this context may differ from statutory IFRS accounting balance sheet carrying values;
- Credit Conversion Factor ('CCF') converts the amount of a free credit line and other off-balance-sheet transactions (with the exception of derivatives) to an EAD amount. This function is used to calculate the exposure at default. This technique does not apply as PHUK Group does not offer credit lines;
- Credit Risk Mitigation ('CRM') is defined as a technique to reduce the credit risk associated with an exposure by application of credit risk mitigants such as collateral, guarantees and credit protection;

- Geographic area is based on the country location for the counterparty; and
- **Residual maturity** is defined as the period outstanding from the reporting date to the maturity or end date of an exposure.

Table 9: EU CRB-B - Total and average net amount of exposures

The following tables show the credit risk pre-CRM techniques using the standardised approach by exposure class.

At 31 December 2021 (£m)	Net value of exposures at the end of the period	Average net exposures over the period
Central governments/banks	165.2	165.6
Corporates	4.8	2.9
Institutions	462.5	445.7
Other items	23.0	22.7
Equity	12.8	12.5
Total	668.3	649.4

Table 10: EU CRB-C - Geographical breakdown of exposures

This table shows pre-CRM exposure by class and by geographic area of the counterparty.

At 31 December 2021 (£m)	UK	United States	Belgium	France	Netherlands	Other	Total

Total	423.5	121.5	101.6	_	21.7	668.3

5.4 Analysis of past due and impaired exposures

An aspect of credit risk management relates to problem debt management, which entails early problem identification through to litigation and recovery of cash where there is no realistic potential for rehabilitation.

The following tables provide an analysis of past due and impaired exposures using the following definitions:

- past due exposure is when a counterparty has failed to make a payment when contractually due; and
- **impaired exposure** is when the entity does not expect to collect all the contractual cash flows when they are due.

As at 31 December 2021, PHUK Group had no material impaired assets for which a specific or general provision was required. Credit risk mitigation is represented by collateral received. There were no material assets past due greater than 90 days. PHUK Group did not incur any material write-offs of bad debts or make any recovery of amounts previously written off during the year.

Table 13: EU CR1-A - Credit quality of exposures by exposure class and instrument

This table provides a comprehensive picture of the credit quality of on- and off-balance sheet exposures.

6 Article 453 CRR - Credit risk mitigation techniques

Credit risk mitigation at 31 December 2021

PHUK Group mitigates credit risk through a variety of strategies including obtaining collateral, and indemnities from clients.

6.1 ISDA master agreements and netting

The International Swaps and Derivatives Association ('ISDA') Master Agreement incorporates schedules that allow the contracting parties to customise the terms and conditions to their mutual satisfaction to cover termination events, netting arrangements, security and other matters.

Netting may take two different forms, close-out netting and settlement netting. Whilst PHUK does not currently offer Foreign Exchange ('FX') Forward business, PHUK Group does adhere to the ISDA dispute resolution Stay Protocol whereby adopting institutions agree to obey resolution-related regulatory stays (up to 48 hours) imposed by any of 6 major jurisdictions with respect to other adopting institutions.

6.2 Collateral valuation and management

Financial and other eligible collateral can include cash, debt securities, or equities, and their values are taken into account for the purposes of calculating the risk weighted exposure amount of the underlying exposure.

There are no exposures covered by guarantees or credit derivatives at 31 December 2021. Using guarantees has the effect of replacing the risk-weight of the underling exposure with that of the institution providing the credit protection. Guaranters are primarily rated as investment grade.

6.3 Wrong-way risk

PHUK Group seeks to minimise the effects of wrong-way risk between collateral and exposures. Wrong-way risk results when the exposure to the client or market counterparty increases when the counterparty's credit quality deteriorates.

6.4 Credit concentration risk

PHUK Group is exposed to credit concentration risk through exchanges and central counterparties, correspondent banks and issuers of securities. These risks are managed and mitigated through the establishment of various limits, on-going monitoring of exposure, collateral and contractual obligations upon the client, including margin calls.

Ongoing assessments of credit concentration risk are performed as part of the Pillar 2 risk assessment process.

The number of counterparties PHUK Group is willing to place funds with is limited and hence, concentration risk can arise from cash balances placed with a relatively small number of counterparties. To mitigate this, exposures are only placed on a very short-term basis, generally overnight (maximum of 180 days), ensuring ability to withdraw funds in a timely manner.

Table 16: EU CR3 - Credit risk mitigation techniques - overview

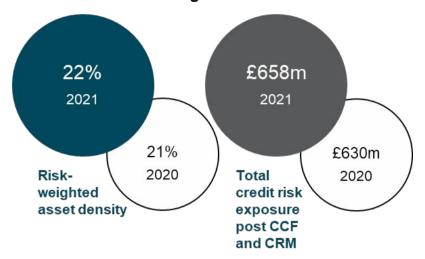

This table shows the extent of credit risk mitigation techniques utilised by PHUK Group.

At 31 December 2021 (£m)	Exposures unsecured: carrying amount	Total exposures secured	Exposures secured by collateral	Exposures secured by financial guarantees	Exposures secured by credit derivatives
Central governments/banks	165.2	_	_	_	_
Corporates	4.8	_	_	_	_
Institutions	451.8	10.7	10.7	_	_
Other items	23.0	_	_	_	_
Equity	12.8	_	_	_	_
Total exposures	657.6	10.7	10.7	_	_
Of which defaulted	_	_	_	_	_

Financial and other eligible collateral can include cash, debt securities, or equities, and their values are taken into account for the purposes of calculating the risk-weighted exposure amount of the underlying exposure.

7 Article 444 CRR - External credit rating assessment institutions

The standardised approach requires PHUK Group to use risk assessments prepared by External Credit Rating Assessment Institutions ('ECAI') to determine the risk-weightings applied to rated counterparties. PHUK Group uses S&P Global Ratings, Moody's and Fitch Ratings as its chosen ECAls. There has been no change to these ECAIs during the year.

Table 17: Mapping of ECAIs credit assessments to credit quality steps

PHUK Group uses Credit Quality Steps ('CQS') to calculate the RWAs associated with credit risk exposures. Each CQS maps to the ECAIs' credit assessments.

This table shows the mapping of PHUK Group's nominated ECAIs' credit assessments to the credit quality steps.

Credit quality steps	S&P Global Ratings	Moody's	Fitch Ratings
1	AAA to AA-	Aaa to Aa3	AAA to AA-
2	A+ to A-	A1 to A3	A+ to A-
3	BBB+ to BBB-	Baa1 to Baa3	BBB+ to BBB-
4	BB-+ to BB-	Ba1 to Ba3	BB+ to BB-
5	B+ to B-	B1 to B3	B+ to B-
6	CCC+ and below	Caa1 and below	CCC+ and below

Table 18: Credit quality steps and risk-weights

ECAI risk assessments are used for each exposure class except eligible retail exposures which are assigned a risk-weight of 75%. In accordance with the regulations, institutions with a residual maturity of three months or less denominated and funded in the national currency of the borrower shall be assigned a risk-weight different to institutions with a risk-weight of more than three months. This distinction is shown in the table below.

The table on the following page shows the prescribed risk-weights associated with the credit quality steps by exposure class.

Exposure class	CQS 1	CQS 2	CQS 3	CQS 4	CQS 5	CQS 6
Central governments and central banks	0 %	20 %	50 %	100 %	100 %	150 %
Public sector entities	20 %	50 %	100 %	100 %	100 %	150 %
Institutions	20 %	50 %	50 %	100 %	100 %	150 %
Institutions up to 3 months residual risk	20 %	20 %	20 %	50 %	50 %	150 %
Unrated institutions	20 %	50 %	100 %	100 %	100 %	150 %
Corporates	20 %	50 %	100 %	100 %	150 %	150 %
Securitisation	20 %	50 %	100 %	350 %	1250 %	1250 %
Institutions and corporates with short-term credit assessment	20 %	50 %	100 %	150 %	150 %	150 %
Collective investment undertakings ('CIUs')	20 %	50 %	100 %	100 %	150 %	150 %
Covered bonds	10 %	20 %	20 %	50 %	50 %	100 %

When calculating the risk-weighted value of an exposure using the ECAI risk assessments, PHUK Group identifies the customer, the maturity of the transaction, and the relevant credit quality step to determine the risk-weight percentage.

Table 19: EU CR4 - Credit risk exposure and credit risk mitigation ('CRM') effects

This table shows the effect of the standardised approach on the calculation of capital requirements for PHUK Group. Risk-weighted exposure amount ('RWA') density provides a synthetic metric on the riskiness of each portfolio.

	Exposures	pre-CCF and CRM	Exposures po	st-CCF and CRM	RWA	RWA density
	Balance	sheet amount	Balance sh	eet amount		
At 31 December 2021 (£m)	On-	Off-	On-	Off-

8 Article 439 CRR - Exposure to counterparty credit risk

Counterparty credit risk arises in limited circumstances when PHUK Group approves a client or counterparty to deliver a security against payment, or vice versa. The settlement or delivery date is later than the market standard for this particular type of transaction or five business days after the date on which the parties enter into the transaction, whichever is earlier.

Table 21: EU CCR1 - Analysis of the counterparty credit risk ('CCR') exposure by approach

This table shows a comprehensive view of the methods used to calculate counterparty credit risk regulatory requirements and the main parameters used within each method.

Counterparty credit risk (£m)		
Long settlement transactions - mark-to-market method	31-Dec-21	31-Dec-20
Net current credit exposure	7.9	17.5
Collateral held notional value	_	_
Exposure and collateral adjustments	_	_
Net credit exposure	7.9	17.5
Risk-weighted assets	1.6	3.5
SFT - under financial collateral comprehensive method	31-Dec-21	31-Dec-20
Net current credit exposure	_	_
Net SFT credit exposure	_	_
Risk-weighted assets	_	_
Counterparty credit risk exposure	7.9	17.5

Note: SFT (Securities Financing Transactions)

Credit valuation adjustment 8.1

The credit valuation adjustment is the capital charge for potential mark-to-market losses due to the credit quality deterioration of a counterparty. The standardised approach uses the external credit rating of each counterparty and includes the effective maturity and exposure at default.

As at 31 December 2021 PHUK Group has no exposure subject to the credit valuation adjustment capital charge.

Table 22: EU CCR3 - CCR exposures by regulatory portfolio and risk

This table shows the breakdown of counterparty credit risk exposures by exposure class and risk-weight according to the standardised approach.

At 31 December 2021 (£m)	— %	20 %	75 %	100 %	Other	Total

Carrying amount of selected financial liabilities	77.5	77.5
Deposits	77.5	77.5
Collateralised deposits other than repurchase agreements	77.5	77.5
Total sources of encumbrance	77.5	77.5

Note: ABS ('Asset-Backed Securities')

10 Article 445 CRR - Exposure to market risk

Market risk is the risk of adverse change to the economic condition of PHUK Group resulting from variations in prices, rates, implied volatilities, or correlations of market risk factors. Market risk factors include but are not limited to interest rates, foreign exchange rates, equity prices, credit spreads, prepayment rates, and commodity prices. All open positions are closely monitored.

Table 27: EU MR1 - Market risk

This table shows components of the capital requirements and risk-weighted assets for market risk using the standardised approach.

At 31 December 2021 (£m)	Risk-weighted assets	Capital requirements
Foreign exchange risk	45.6	3.6
Total	45.6	3.6

11 Article 447/448 CRR - Equities and interest rate risk in the banking book

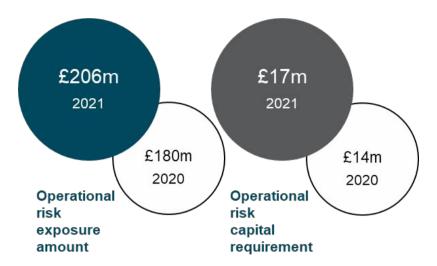

The equity exposure held by PHUK Group comprises a minority shareholding in Euroclear Holding SA/NV which is held at fair value subject to periodic impairment review. For unquoted equity securities the fair value is estimated using appropriate valuation techniques which rely on unobservable inputs and therefore require some degree of estimation to calculate a fair value (Level 3 inputs). If the adjusted net asset value changed by 1% the value of the unquoted equity securities would change by by £128,000 (2020: £128,000). At the reporting date, the exposure was valued at £12.8 million (2020: £12.8 million), with an immaterial unrealised loss (2020: £2.7 million gain).

Interest rate risk ('IRR') is the risk associated with changes in interest rates that affect net interest income ('NII') from interest-earning assets and interest-paying liabilities. IRR exposure in the non-trading book arises from on and off-balance sheet assets and liabilities and changes with movements in domestic and foreign interest rates.

PHUK Group's exposure to interest rate risk is not deemed to be material given that it relates predominantly to client money balances.

12 Article 446 CRR - Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, systems, or from external events (including legal risk but excluding strategic and reputation risk).

Operational risk may arise from errors in transaction processing, breaches of internal control, systems and compliance requirements, internal or external fraud, damage to physical assets, and/or business disruption due to systems failures or other events. Operational risk can also arise from potential legal or regulatory actions as a consequence of non-compliance with regulatory requirements, prudent ethical standards or contractual obligations.

Operational risk includes any operational risk to achieving the business objectives of PHUK Group and causing financial loss, regulatory action or reputational damage to the standing of PHUK Group.

12.1 Operational risk management framework

PHUK Group seeks to manage the inherent risk within its operational processes through an Operational Risk Management Framework ('ORMF').

The ORMF provides consistent capture, management and governance of operational risks. It is aligned around the elements of the risk management cycle (Identify, Measure, Manage and Report) and includes the requirements of good governance and capital planning as key elements.

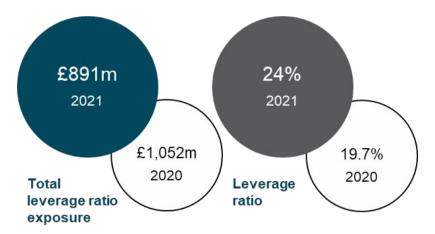

12.2 Operational risk capital resource requirement

PHUK Group calculates the Pillar 1 operational risk capital resource requirement under the standardised approach. Pershing has three applicable business lines as below with their beta factor.

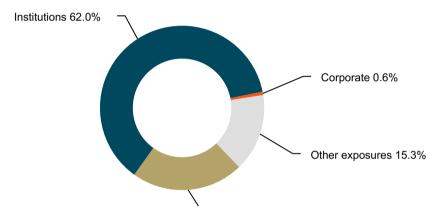

Category	Beta
Trading and sales	18%
Agency services	15%
Retail brokerage	12%

13 Article 451 CRR - Leverage

CRR banking book leverage ratio exposures

Exposures treated as sovereigns 22.1%

PHUK Group is not subject to a leverage ratio requirement in the UK and the ratio is provided for information purposes only.

In accordance with article 499 (2) and (3) of the CRR the leverage ratio is calculated based on Tier 1 capital and is calculated using the end-of-quarter leverage ratio as per the EBA implementing technical standards ('ITS') on the disclosure of the leverage ratio under Article 451(2) of Regulation (EU) No 575/2013 (CRR). The capital measure for the leverage ratio is the Tier 1 capital of the risk-based capital framework, taking into account transitional arrangements. Total exposure measure is the sum of the following exposures:

- · on-balance sheet exposures;
- derivative exposures;
- security financing transaction ('SFT') exposures; and,
- off-balance sheet items.

Although the BNY Mellon Corporation manages its leverage ratio in line with US regulatory limits, the PHUK Group itself is not subject to a leverage ratio requirement in the UK.

Nevertheless the PHUK Group monitors its leverage position and reports accordingly. The table below is reflective of the standard reporting format, but the PHUK Group is mindful of the exclusion for Bank of England reserves from the leverage exposure value that has been prescribed by the PRA, which would dramatically reduce this value and hence increase the leverage ratio itself.

Table 28: LR1 - Leverage ratio summary

This table shows PHUK Group's summary reconciliation of accounting assets and leverage ratio exposures.

At 31 December 2021 (£m)	
Total assets	968.9
Adjustment for entities which are consolidated for accounting purposes but are outside the scope of regulatory consolidation	_
Adjustment for fiduciary assets recognised on the balance sheet pursuant to the applicable accounting framework but excluded from the leverage ratio exposure measure in accordance with Article 429 (13) of Regulation (EU) No 575/2013 "CRR"	_
Adjustments for derivative financial instruments	_
Adjustments for securities financing transactions (SFTs)	_

Human resources

14 Article 450 CRR - Remuneration policy

Note: Due to a significant change in the Pershing MRT identification process, the number of Pershing MRTs for 2021 has broadly doubled compared to 2020, resulting in a similar increase in total remuneration.

14.1 Governance

The governance of remuneration matters for BNY Mellon and its group entities, including Pershing, is overseen by four committees, each with separate responsibilities in respect of remuneration as summarised on the following pages:

Human Resources and Compensation Committee of BNY Mellon ('HRCC') is responsible for overseeing BNYM's employee compensation and benefits policies and programmes globally. It reviews and is responsible for the compensation plans, policies and programs in which the senior officers participate and has general oversight for the other incentive, retirement, welfare and equity arrangements for all employees globally. The members of the HRCC are non-executive members of BNY Mellon's Board of Directors, acting on behalf of its Board of Directors.

Compensation Oversight Committee of BNY Mellon ('COC') is responsible for overseeing all incentive plans and regulatory matters related to company incentive plans and ensuring compensation plans are based on sound risk management. It provides governance and risk oversight and advises the HRCC on any compensation risk issues. The members of the COC are senior members of BNY Mellon management, including the Chief Human Resources Officer, the Chief Risk Officer, the Chief Financial Officer ('CFO') and the Head of Compensation & Benefits.

EMEA Remuneration Advisory Committee ("ERAC") is a regional governance body which oversees the development and implementation of remuneration policies and practices in line with specific regulatory provisions that apply to EMEA entities as well as ensuring consistency with Company principles.

Incentive Compensation Review Committee ('ICRC') is the coordinating body of senior executives responsible for the oversight of the process of evaluating and recommending compensation reductions for all employees. These decisions are based on feedback regarding risk, compliance, audit and legal outcomes as well as situations of an employee engaged in fraud or who has directly or indirectly contributed to a financial restatement or other irregularity. The ICRC is a management-level committee that reports its recommendations to the HRCC. Ex-ante adjustments are recommended by the employee's management for review and approval by the committee and expost adjustments are formulated by the committee. The Chief Human Resources Officer chairs the committee supported by the Global Head of Compensation and Benefits. Voting members include the Chief Executive Officer, Chief Risk Officer, Chief Compliance Officer, Chief Auditor, Chief Financial Officer and General Counsel.

BNY Mellon undergoes an annual attestation process to ensure that its remuneration practices comply with all local laws and regulations as well as best market practice. The implementation of BNY Mellon's remuneration policies is subject to an annual independent internal review by the internal audit function.

14.2 Aligning pay with performance

BNY Mellon's compensation philosophy is to offer a total compensation opportunity that supports our values, client focus, integrity, teamwork and excellence. The Company pays for performance, both at the individual and corporate level. The Company values individual and team contributions and rewards based on how both contribute to business results. In support of this philosophy, variable compensation is used as a means of recognising performance.

Through our compensation philosophy and principles, the Company aligns the interests of our employees and shareholders by encouraging actions that contribute to superior financial performance and long-term shareholder value; by rewarding success; and by ensuring that our incentive compensation arrangements do not encourage our employees to take unnecessary and excessive risks that threaten the value of BNY Mellon or benefit individual employees at the expense of shareholders or other stakeholders. Our compensation structure is comprised of an appropriate mix of fixed and variable compensation that is paid over time. We aim to ensure that both fixed and variable compensation are consistent with business and market practice, fixed compensation is sufficient to provide for a fully flexible variable compensation program, and variable compensation is in the form of annual and/ or long-term incentives, and, where appropriate, granted over equity to align employee remuneration with that of shareholder growth.

14.3 Fixed remuneration

Fixed remuneration is composed of (i) salary, (ii) any additional non-performance related amounts paid as a result of contractual obligations or applicable law, or as a result of market practice, including role-based allowances, and (iii) any benefits in kind which are awarded as a result of the responsibilities of the job rather than the performance within the job.

The fixed remuneration of an employee is determined by the job performed, its level of complexity and responsibility, and the remuneration paid in the market for that type of job. It is set, for all staff, at a rate to be at all times sufficient to provide for full flexibility with regards to any variable remuneration element, including zero variable remuneration.

Employees who are directors of other BNY Mellon group entities are not remunerated separately in their capacity as a director of those entities. Independent directors of BNY Mellon only receive fixed remuneration, as disclosed in BNY Mellon's annual Proxy Statement to shareholders.

14.4 Ratio between fixed and variable pay

In respect of remuneration to material risk takers as determined under the requirements of the PRA and FCA ('MRTs'), the shareholder of Pershing, The Bank of New York Mellon Corporation, approved an increase in the maximum ratio of Variable to Fixed pay from 100% to 200%. This increase was confirmed by the HRCC on 27 January 2014 on the grounds that the increased ratio would not affect the firm's ability to maintain a sound capital base, and allows for appropriate incentivisation and reward in accordance with our Pay for Performance philosophy.

14.5 Variable compensation funding and risk adjustment

The employees of Pershing are eligible to be awarded variable compensation but have no entitlement to such awards which are discretionary in nature.

Incentive pools are discretionary and the baseline pool is determined based on prior year actuals, taking into account growth and productivity savings. The final pool is determined by the CEO and CFO, taking into account a number of factors, including corporate performance, business performance, productivity and risk management. The pool is subject to adjustment based on overall corporate performance achievement, and awards are made from the pool based on individual performance.

The remuneration for key control functions is set independently of the businesses they oversee and is based primarily on their respective control functions' objectives.

Variable compensation may consist of both cash and equity and both upfront and deferred components and is determined by the functional hierarchy of the business or business partner service to which the individual staff member belongs, and in accordance with the terms and conditions of the incentive compensation plan that is applicable for the business or business partner service.

For MRTs, the variable compensation portion of an award comprises four different parts: upfront cash, upfront equity, deferred cash and deferred equity, in order to comply with local regulations. The deferred compensation component awarded in the form of BNY Mellon restricted stock units aligns a portion of the variable compensation award with the management of longer-term business risk.

Variable compensation is determined by the business performance and an individual's performance as measured against feedback on results-based goals and behaviours (BNY Mellon's global competencies and values; Risk & Compliance obligations; and a Diversity/Inclusion goal).

MRTs are subject to an additional layer of performance assessment, referred to as the Risk Culture Summary Scorecard ('RCSS'). The RCSS score for each individual is based on separate ratings of five risk factor areas.

14.6 Deferral policy and vesting criteria

Corporate Policy (General): Awards are delivered to employees entirely in cash (payable shortly after the date of award), except where the employee's total incentive award exceeds a particular threshold (or where they are of a particular level of role. (This is set out in the table on the following page). In this case, a portion of the annual incentive award is deferred over a period of at least four years – this portion vests in equal portions on the first, second, third and fourth anniversary of the date of award (subject to the employee remaining in employment on each of these dates).

	Total incentive award (US\$000)				
Level	< 50.0	50.0 to 149.9	150 to 249.9	250 to 499.9	>= 500.0
J, K and L	_	15.0%	20.0%	25.0%	30.0%
М	_	25.0%	30.0%	35.0%	40.0%
S	_	32.5%	40.0%	45.0%	50.0%

Regulatory Policy: For identified MRTs, in receipt of total remuneration of £500,000 or more, and variable remuneration greater than 33% of total remuneration, the Corporate Deferral Rules are superseded by the Regulatory Deferral Rules as follows:

- a) at least 40% of variable remuneration is deferred unless the MRT is a Director of a significant entity or if their variable remuneration exceeds £500,000, in which case 60% of variable remuneration is deferred;
- b) variable remuneration is deferred for 3-7 years depending upon the MRT category (and whether the individual is identified as an MRT for other BNY Mellon entities);
- c) at least 50% of variable remuneration (upfront and deferred) is delivered in shares or equivalent instruments; and,
- d) each tranche of deferred vested equity is subject to a retention period post vesting before it may be sold.

40% Deferral Table			60% Defer	ral Table	
	Upfront	Deferred		Upfr	ont Deferred
Cash	30.0%	20.0%	C	ash 20.0	0% 30.0%
Equity	30.0%	20.0%	Eq	uity 20.0	0% 30.0%

14.7 Variable remuneration of control function staff

The variable compensation awarded to control function staff (for example: audit, compliance and risk) is dependent on performance that is assessed according to the achievement of objectives specific to their functional role that is independent of the activities they oversee. Remuneration is benchmarked against the market level and funded independently of individual business line results and adjusted based on BNY Mellon's overall annual financial performance.

14.8 Quantitative disclosures

The tables below provide details of the aggregate remuneration of MRTs for Pershing Ltd and Pershing Securities International Ltd (regardless of employing entity) for the year ending 31 December 2021.

The remuneration amounts are presented on a gross basis, regardless of the time spent by BNY Mellon staff in respect of Pershing to reflect the full reporting period.

The tables below show the combined remuneration data for seven Senior Manager MRTs and twenty seven Other MRTs.

MRTs categorised as 'Senior Managers' carry out a senior management function as determined by the relevant regulators.

Table 31: REM1 - Aggregate remuneration expenditure by business

This table shows the aggregate remuneration expenditure for MRTs in 2021 by business.

	Pershing	Other ²	Total
Total remuneration (£000s) ¹	3,103	5,314	8,417

¹ Includes base salary and other cash allowances, plus any incentive awarded for full year 2021. Pension contribution is not included.

² Other consists of the functions Risk & Compliance and Technology.

Table 32: REM2 - Aggregate remuneration expenditure by remuneration type

This table shows the aggregate remuneration expenditure for MRTs by remuneration type in 2021.

Identified staff	Senior management	Other MRTs	Total MRTs
Number of beneficiaries	7	27	34
Total remuneration (£000s)	1,982	6,435	8,417
Total variable remuneration vs total remuneration (%)	30 %	31 %	31 %
Total fixed remuneration (£000s) ³	1,387	4,417	5,804
Total variable remuneration (£000s)	595	2,018	2,613
Variable cash (£000s)	356	1,242	1,598
Variable shares (£000s)	239	776	1,015
Total deferred remuneration awarded during the financial year (£000s)	212	650	862
Total deferred remuneration paid out during the financial year (£000s)	422	642	1,064
Total deferred remuneration reduced through performance adjustments (£000s)	_	_	_

³ Fixed remuneration includes base salary and any cash allowances. Pension contribution is not included.

Table 33: REM3 - Deferred variable remuneration

This table shows the total deferred remuneration for MRTs outstanding from previous years.

Identified staff	Senior management	Other MRTs	Total MRTs
Number of beneficiaries	5	16	21
Total deferred variable remuneration outstanding from previous years (£000s)	1,353	3,494	4,847
Total vested (£000s) ⁴	422	642	1,064
Total unvested (£000s) 5	931	2,852	3,783

⁴ Includes total vested cash and equity. Equity portion is valued as at the date the award vested.

There were no sign-on and severance payments made during 2021.

There were also no individuals remunerated GBP 1 million or more.

⁵ Includes total unvested cash and equity. Equity portion is valued as at 1 January 2022.

Appendix 1 Other risks

Liquidity risk

PHUK Group defines Liquidity risk as the inability to access funding, convert assets to cash quickly and efficiently, or to roll over or issue new debt, especially during periods of market stress, at a reasonable cost in order to meet its short-term (up to one year) obligations.

Liquidity risk can arise from funding mismatches, market constraints from the inability to convert assets to cash, meet Client Free Money withdrawals, or contingent liquidity events. Changes in economic conditions or exposure to credit, market, legal, operational and reputational risks also can affect PHUK Group's liquidity risk profile and are considered in the liquidity risk framework.

The Board has established the PHUK Group's liquidity risk appetite and tolerances that are appropriate for the its business strategy and reflect the financial condition and funding capacity. In this context, ALCO and the Board consider PHUK Group to be risk adverse due to the nature of its main business; i.e. clearing and settlement services.

Recognising the fact that PHUK Group business is driven not by balance sheet size, but is transaction based by nature, the ALCO has set overall liquidity risk appetite measures and thresholds, which have been approved by the Board, to ensure that PHUK Group maintains strong liquidity at all times.

A mix of metrics and limits are a quantitative and qualitative reflection of PHUK Group's liquidity risk tolerance. PHUK Group seeks to ensure that the overall liquidity risk that it undertakes stays within its risk appetite.

Group risk

Group risk is the risk that the financial position of PHUK Group may be adversely affected by its relationships and arrangements (financial and non-financial) with other entities in the BNY Mellon group or by risks that may affect the whole group.

PHUK Group maintains appropriate oversight and ownership of all processes and activities outsourced to other group entities. Because group risk typically arises as a consequence of another risk event and, as such, PHUK Group considers group impact as part of its overall risk management process.

Business and financial risk

Business risk

Business risk is the risk to PHUK Group arising from changes in its business including the acute risk to earnings posed by falling or volatile income; and the broader risk of PHUK Group's business model or strategy proving inappropriate due to macroeconomic, geopolitical, industry, regulatory or other factors; or its remuneration policy.

The PHUK Group business model has been clearly defined, in place for a number of years, is relatively transparent and contained within its business sector. This is not envisaged to change.

Non-trading book exposures in equities

As at 31 December 2021 PHUK Group had £12.8 million of non-trading book exposures in equities. All equity investments are unquoted.

Residual risk

Residual risk may arise from the partial performance or failure of credit risk mitigation techniques for reasons, such as ineffective documentation, a delay in payment or the inability to realise collateral held by the underlying client in a timely manner.

Given the nature of PHUK Group's business, residual risk occurs only in respect of the right to use securities as collateral and the Credit and Market risk capital calculation, therefore, includes the potential impact of residual risk.

Any shortfall remaining after the application of the collateral may be covered by:

- legal recourse to pursue either PHUK Group's client or the underlying investor, while also retaining the right to proceed against the other party in respect of any shortfall in the amount recovered;
- ultimately, PHUK Group retains the right to restrict or terminate a relationship that presents an unacceptable risk to its business; and,
- insurance claim under PHUK Group's own Professional Indemnity cover or against third parties.

Compliance and conduct risk

Compliance risk covers the risk relating to earnings or capital from violation, or non-conformance with laws, rules, regulations, prescribed practices or ethical standards which may, in turn, expose the PHUK Group and its executives to fines, payment of damages, the voiding of contracts and damaged reputation.

PHUK Group's compliance arrangements are inherently risk-based. The arrangements are supported by regular compliance assessments which identify and measure areas of compliance risk and help drive the Compliance Monitoring plan which focuses on those areas of the business identified as being of higher risk. The compliance arrangements also include a programme to identify and support the implementation of regulatory change items of relevance to the PHUK Group. In addition, the PHUK Group ensures that all staff receive adequate compliance training so that they understand their regulatory responsibilities and the relevance of compliance risk to their roles.

Conduct risk is defined as the risk that detriment is caused to clients, the market, the PHUK Group or its employees because of inappropriate execution of business activities or inappropriate behaviour by the PHUK Group or its employees.

The PHUK Group is subject to the Group Conduct Risk Policy and Code of Conduct. It sets out clear expectations of the roles of senior management in setting the appropriate tone and includes examples of good and poor conduct. Employees receive periodic training on conduct related matters and are required to complete an annual process to confirm adherence to the Code of Conduct.

Appendix 2 Glossary of terms

The following acronyms are a range of terms which may be used in BNY Mellon EMEA Pillar 3 disclosures:

Acronym	Description	Acronym	Description
ABS	Asset-Backed Securities	CGB	CASS Governance Body
ACPR	Autorite de Controle Prudentiel et de	CIS	Collective Investment Scheme
	Resolution	CMA	Capital Market Authority
AFR	Available Financial Resources	COC	Compensation Oversight Committee
AIF	Alternative Investment Fund	COOC	CASS Operational Oversight Committee
ALCO	Asset and Liability Committee	COREP	Common Reporting
AML	Anti-Money Laundering	CQS	Credit Quality Steps
AS	Asset Servicing	CRD	Capital Requirements Directive
AT1	Additional Tier 1	CRM	Credit Risk Mitigation
AUC	Assets Under Custody	CRO	Chief Risk Officer
BAC	Business Acceptance Committee	CROC	Credit Risk Oversight Committee
BAU	Business as usual	CRR	Capital Requirements Regulation
BaFin	Federal Financial Supervisory Authority / Bundesanstalt fur	CSD	Client Service Delivery
	Finanzdienstleistungsaufsicht	CSRSFI	Committee for Systemic Risks and System-relevant Financial Institutions
BDAS	Broker-Dealer and Advisory Services	CSSF	Commission de Surveillance du Secteur
BDF	Banque De France	000.	Financier
BEMCO	Belgium Management Council	CSTC	Capital and Stress Testing Committee
BI	Banca D'Italia	CT	Corporate Trust
BNY Mellon	The Bank of New York Mellon Corporation	CTS	Client Technology Solutions
BNY Mellon	The Bank of New York Mellon	DB	Deutsche Bank
SA/NV	SA/NV	DNB	De Nederlandsche Bank
BNY Mellon	BNY Mellon Trust & Depositary	DVP	Delivery versus Payment
TDUKL	(UK) Limited	EAD	Exposure at default
BNYIFC	BNY International Financing Corporation	EC	European Commission
BNY Mellon	BNY Mellon Service	ECL	Expected Credit Losses
KG	Kapitalanlage-Gesellschaft mbH	ECAP	Economic Capital
BRC	Business Risk Committee	ECB	European Central Bank
CASS	Client Asset Sourcebook Rules	ECM	Embedded Control Management
CBI	Central Bank of Ireland	EEC	EMEA Executive Committee
CCF	Credit Conversion Factor	EHQLA	Extremely High Quality Liquid Assets
CEO	Chief Executive Officer	EMEA	Europe, Middle East and Africa
CEF	Critical Economic Function	ERGC	EMEA Remuneration Governance
CET1	Common Equity Tier 1		Committee

Acronym	Description	Acronym	Description
ESRMC	EMEA Senior Risk Management	IMMS	International Money Management System
EU	Committee European Union	ISDA	International Swaps and Derivatives Association
EUR	Euro	ISM	Investment Services and Markets
EWI	Early Warning Indicators	IT	Information Technology
ExCo	Executive Committee	KRI	Key Risk Indicator
FCA	Financial Conduct Authority	KYC	Know your customer
FMUs	Financial market utilities	LAB	Liquidity Asset Buffer
FRS	Financial Reporting Standard	LCR	Liquidity Coverage Ratio
FSMA	Financial Services and Markets Authority	LERO	Legal Entity Risk Officer
FX	Foreign Exchange	LOB	Line of Business
G-SIFI	Global Systemically Important Financial	LOD	Line of Defense
GCA	Institution Global Custody Agreement	MiFID II	Markets in Financial Instruments Directive II
GSP	Global Securities Processing	MNA	Master Netting Agreements
HLA	High-level Assessment	MRMG	Model Risk Management Group
HQLA	High Quality Liquid Assets	MRT	Material Risk Taker
HRCC	Human Resources Compensation	NAV	Net Asset Value
	Committee	NBB	National Bank of Belgium
IAS	International Accounting Standards	NomCo	Nomination Committee
IASB	International Accounting Standards Board	NSFR	Net Stable Funding Ratio
ICA	Internal Capital Assessment	O-SII	Other systemically important institution
ICAAP	Internal Capital Adequacy Assessment Process	OCI	Other Comprehensive Income
ICRC	Incentive Compensation Review	OEICs	Open-ended Investment Companies
	Committee	ORMF	Operational Risk Management Framework
IFPR	Investment Firm Prudential Regime	ORSA	Operational Risk Scenario Analysis
IFRS	International Financial Reporting	P/L	Profit and Loss
	Standards	PFE	Potential Future Exposure
ILAAP	Internal Liquidity Adequacy Assessment Process	PRA	Prudential Regulatory Authority
ILG	Individual Liquidity Guidance	RCoB	Risk Committee of the Board
IRRBB	Interest Rate Risk on Banking Book	RCSA	Risk and Control Self-Assessment
IMMS	International Money Management System	RM	Risk Manager
ISDA	International Swaps and Derivatives	RMC	Risk Management Committee
	Association	RMP	Risk Management Platform
ISM	Investment Services and Markets	RRP	Recovery and Resolution Planning
ILG	Individual Liquidity Guidance	RW	Risk-weight
IRRBB	Interest Rate Risk on Banking Book	RWA	Risk Weighted Assets

Acronym	Description	Acronym	Description
SA	Standardised Approach	T1 / T2	Tier 1 / Tier 2
SFT	Security Financing Transaction	TCR	Total Capital Requirements
SLD	Service Level Description	TRC	Technology Risk Committee
SREP	Supervisory review and evaluation process	TLAC	Total Loss-Absorbing Capacity
SRO	Senior Risk Officer	UCITS	Undertakings for Collective Investment in
T&D	Trust & Depositary		Transferable Securities
		VaR	Value-at-Risk

The following terms may be used in BNY Mellon EMEA Pillar 3 disclosures:

Ad valorem: Method for charging fees according to the value of goods and services, instead of by a fixed rate, or by weight or quantity. Latin for, [according] to the value

Basel III: The capital reforms and introduction of a global liquidity standard proposed by the Basel Committee on Banking Supervision ('BCBS') in 2010

BIPRU: Prudential sourcebook for banks, building societies and investment firms

Brexit: The United Kingdom's referendum decision to leave the EU

CRD IV: On 27 June 2013, the European Commission published, through the Official Journal of the European Union, its legislation for a Capital Requirements Directive ('CRD') and Capital Requirements Regulation ('CRR'), which together form the CRD IV package. Amendments published on 30 November 2013 were made to the Regulation. The package implements the Basel III reforms in addition to the inclusion of new proposals on sanctions for non-compliance with corporate governance and prudential rules, remuneration. CRD IV rules apply from 1 January 2014 onwards, with certain requirements set to be phased in

Capital Requirements Directive ('CRD'): A capital adequacy legislative package issued by the European Commission and adopted by EU member states

Capital Requirements Regulation ('CRR'): Regulation that is directly applicable to anyone in the European Union and is not transposed into national law

Common Equity Tier 1 capital: The highest quality form of regulatory capital under Basel III comprising common shares issued and related share premium, retained earnings and other reserves excluding the cash flow hedging reserve, less specified regulatory adjustments

Core Tier 1 capital: Called-up share capital and eligible reserves plus equity non-controlling interests, less intangible assets and other regulatory deductions

Credit risk mitigation ('CRM'): A technique to reduce the credit risk associated with an exposure by application of credit risk mitigants such as collateral, guarantees and credit protection

Derivatives: A derivative is a financial instrument that derives its value from one or more underlying assets, for example bonds or currencies

Exposure: A claim, contingent claim or position which carries a risk of financial loss

Exposure at default ('EAD'): The amount expected to be outstanding, after any credit risk mitigation, if and when a counterparty defaults. EAD reflects drawn balances as well as allowance for undrawn amounts of commitments and contingent exposures over a one-year time horizon

Financial Conduct Authority ('FCA'): The Financial Conduct Authority regulates the conduct of financial firms and, for certain firms, prudential standards in the UK. It has a strategic objective to ensure that the relevant markets function well

High-level Assessment ('HLA'): An assessment of the quality of controls in place to mitigate risk and residual risk. Residual risk is assessed as high, moderate to high, moderate, moderate to low and low with direction anticipated

Institutions: Under the Standardised Approach, institutions are classified as credit institutions or investment firms

Internal Capital Adequacy Assessment Process ('ICAAP'): The group's own assessment of the levels of capital that it needs to hold through an examination of its risk profile from regulatory and economic capital viewpoints

ISDA Master Agreement: A document that outlines the terms applied to a derivatives transaction between two parties. Once the two parties have agreed to the standard terms, they do not have to renegotiate each time a new transaction is entered into

Key Risk Indicator ('KRI'): Key Risk Indicators are used by business lines to evaluate control effectiveness and residual risk within a business process

Master Netting Agreement: An agreement between two counterparties that have multiple contracts with each other that provides for the net settlement of all contracts through a single payment in the event of default or termination of any one contract

Pillar 3: The part of Basel III that sets out information banks must disclose about their risks, the amount of capital required to absorb them and their approach to risk management. The aim is to encourage market discipline and improve the information made available to the market

Prudential Regulation Authority ('PRA'): The statutory body responsible for the prudential supervision of banks, building societies, credit unions, insurers and major investment firms in the UK. The PRA is a subsidiary of the Bank of England

Residual maturity: The period outstanding from the reporting date to the maturity or end date of an exposure

Risk appetite: A definition of the types and quantum of risks to which the firm wishes to be exposed

Risk and Control Self-Assessment ('RCSA'): Risk and Control Self-Assessment is used by business lines to identify risks associated with their key business processes and to complete a detailed assessment of the risk and associated controls

Risk Governance Framework: The risk governance framework has been developed in conjunction with BNY Mellon requirements. Key elements of the framework are:

- Formal governance committees, with mandates and defined attendees
- Clearly defined escalation processes, both informally (management lines) and formally (governance committees, board, etc.)
- A clear business as usual process for identification, management and control of risks
- · Regular reporting of risk issues

Risk Management Committee ('RMC'): A committee which meets monthly to provide governance on risk related items arising from the business of the group

Risk-weighted Assets ('RWA'): Assets that are adjusted for their associated risks using weightings established in accordance with CRD IV requirements

Standardised Approach ('SA'): Method used to calculate credit risk capital requirements using the Basel III, CRD IV, CRR model supplied by the BCBS. The SA model uses external credit assessment institution ratings and supervisory risk weights supplied by external credit assessment agencies

Tier 2 capital: A component of regulatory capital under Basel III, mainly comprising qualifying subordinated loan capital, related non-controlling interests and eligible collective impairment allowances

Value-at-Risk ('VaR'): A measure of the potential loss at a specified confidence level from adverse market movements in an ordinary market environment

Appendix 4 CRD IV Reference

CRR ref.	Requirement summary	Compliance ref.	Page ref.
Scope of discl	osure requirements		
431 (1)	Institutions shall publish Pillar 3 disclosures	BNY Mellon publishes Pillar 3 disclosures	N/A
431 (2)	Firms with permission to use specific operational risk methodologies must disclose operational risk information	N/A	N/A
431 (3)	Institutions shall adopt a formal policy to comply with the disclosure requirements	BNY Mellon has a dedicated EMEA Pillar 3 policy	N/A
431 (4)	Explanation of ratings decision upon request	N/A	N/A
Non-material,	proprietary or confidential information		
432 (1)	Institutions may omit disclosures if the information is not regarded as material (except Articles 435(2)(c), 437 and 450)		
432 (2)	Institutions may omit information that is proprietary or confidential if certain conditions are respected	1.4 Article 432 CRR - Non-material, proprietary or confidential information	
432 (3)	Where 432 (1) and (2) apply this must be stated in the disclosures, and more general information must be disclosed		6
432 (4)	Paragraphs 1, 2 & 3 are without prejudice to the scope of the liability for failure to disclose material information		
Frequency of	disclosure		
433	Institutions shall publish the disclosures required at least on an annual basis, in conjunction with the date of the publication of the financial statements	1.5 Article 433/434 CRR - Frequency and means of disclosure	6
Means of disci	 osure	<u>I</u>	
434 (1)	Institutions may determine the appropriate medium, location and means of verification to comply effectively	1.5 Article 433/434 CRR - Frequency and means of disclosure	6
434 (2)	Disclosures made under other requirements (e.g. accounting) can be used to satisfy Pillar 3 if appropriate	Any cross-references to accounting or other disclosures are clearly signposted in this document	N/A
Risk managen	nent objectives and policies		'
435 (1)	Institutions shall disclose their risk management objectives and policies	4 Article 435 CRR - Risk management objectives and policies	21
435 (1) (a)	Strategies and processes to manage those risks	4 Article 435 CRR - Risk management objectives and policies	21
435 (1) (b)	Structure and organisation of the risk management function	4 Article 435 CRR - Risk management objectives and policies	21
435 (1) (c)	Scope and nature of risk reporting and measurement systems	4 Article 435 CRR - Risk management objectives and policies	21
435 (1) (d)	Policies for hedging and mitigating risk	4 Article 435 CRR - Risk management objectives and policies	21
435 (1) (e)	Approved declaration on the adequacy of risk management arrangements	4 Article 435 CRR - Risk management objectives and policies	21
435 (1) (f)	Approved risk statement describing the overall risk profile associated with business strategy	4 Article 435 CRR - Risk management objectives and policies	21
435 (2) (a)	Number of directorships held by directors	4.1 Board of Directors	21

435 (2) (b)	Recruitment policy of Board members, their experience and expertise	4.1 Board of Directors	21
435 (2) (c)	Policy on diversity of Board membership and results against targets	4.1 Board of Directors	21
435 (2) (d)	Disclosure of whether a dedicated risk committee is in place, and number of meetings in the year	4.2 Risk committees	23
435 (2) (e)	Description of information flow on risk to Board	4.2 Risk committees	23
Scope of applica	tion		
436 (a)	The name of the institution to which the requirements of this Regulation apply	1 Article 431 CRR - Scope of disclosure requirements	4
436 (b) (i) 436 (b) (ii) 436 (b) (iii) 436 (b) (iii) 436 (b) (iv)	Outline the differences in the basis of consolidation for accounting and prudential purposes, with a brief description of the entities therein, explaining whether they are: fully consolidated; proportionally consolidated; deducted from own funds; neither consolidated nor deducted	1 Article 431 CRR - Scope of disclosure requirements	4
436 (c)	Current or foreseen material practical or legal impediment to the prompt transfer of own funds or repayment of liabilities among the parent undertaking and its subsidiaries	N/A	N/A
436 (d)	Aggregate amount by which the actual Own Funds are less than required in all subsidiaries not included in the consolidation, and the name or names of such subsidiaries	N/A - There are no entities outside the scope of consolidation.	N/A
436 (e)	If applicable, the circumstance of making use of the provisions laid down in Articles 7 & 9	N/A	N/A
Own funds			
437 (1)	Requirements regarding capital resources table	2 Article 437 CRR - Own funds	12
437 (1) (a)	Full reconciliation of Common Equity Tier 1 (CET1) items	Table 2: CC2 - Reconciliation of regulatory capital	13
437 (1) (b)	Description of the main features of the CET1 and Additional Tier 1 and Tier 2 instruments	Table 5: CC1 - Composition of regulatory capital	16
437 (1) (c)	Full terms and conditions of all CET1, Additional Tier 1 and Tier 2 instruments	Table 7: CCA - Main features of regulatory capital instruments	18
437 (1) (d) (i) 437 (1) (d) (ii) 437 (1) (d) (iii)	Each prudent filter applied Each deduction made Items not deducted	Table 6: TLAC1 - Total loss absorbing capacity	17
437 (1) (e)	Description of all restrictions applied to the calculation of Own Funds	N/A - no restrictions apply	N/A
437 (1) (f)	Explanation of the basis of calculating capital ratios using elements of Own Funds	N/A - Capital ratios calculated on basis stipulated in the Regulations	N/A
437 (2)	EBA to publish implementation standards for points above	BNY Mellon follows the implementation standards	N/A
Capital requireme	ents		
438 (a)	Summary of institution's approach to assessing adequacy of capital levels	3 Article 438 CRR - Capital requirements	19
438 (b)	Result of ICAAP on demand from authorities	N/A	N/A
438 (c)	Capital requirement amounts for credit risk for each Standardised Approach exposure class	Table 11: EU CRB-D - Concentration of exposures by counterparty types	28
438 (d) 438 (d) (i) 438 (d) (ii) 438 (d) (iii) 438 (d) (iv)	Capital requirements amounts for credit risk for each Internal Ratings Based Approach exposure class	N/A - internal ratings based approach is not used	N/A

438 (e)	Own funds requirements for market risk or settlement risk, or large exposures where they exceed limits	Table 8: EU OV1 - Overview of RWAs	20
438 (f)	Own funds amounts for operational risk, separately for the basic indicator approach, the standardised approach, and the advanced measurement approaches as applicable	Table 8: EU OV1 - Overview of RWAs	20
438	Requirement to disclose specialised lending exposures and equity exposures in the banking book falling under the simple risk weight approach	N/A - There are no exposures subject to the simple risk weight approach.	N/A
Exposure to coun	L sterparty credit risk ('CCR')		
439 (a)	Description of process to assign internal capital and credit limits to CCR exposures	8 Article 439 CRR - Exposure to counterparty credit risk	36
439 (b)	Discussion of process to secure collateral and establishing reserves	6.2 Collateral valuation and management	31
439 (c)	Discussion of management of wrong-way exposures	6.3 Wrong-way risk	32
439 (d)	Disclosure of collateral to be provided (outflows) in the event of a ratings downgrade	N/A - Credit ratings downgrade is managed at the BNY Mellon Corp level	N/A
439 (e)	Derivation of net derivative credit exposure	Table 21: EU CCR1 - Analysis of the counterparty credit risk ('CCR') exposure by approach	36
439 (f)	Exposure values for mark-to-market, original exposure, standardised and internal model methods	a spp ossur	
439 (g)	Notional value of credit derivative hedges and current credit exposure by type of exposure	N/A - BNY Mellon does not have credit derivative transactions	N/A
439 (h)	Notional amounts of credit derivative transactions for own credit, intermediation, bought and sold, by product type	N/A - BNY Mellon does not have credit derivative transactions	N/A
439 (i)	Estimate of alpha, if applicable	N/A	N/A
Capital buffers			
440 (1) (a)	Geographical distribution of relevant credit exposures	Table 10: EU CRB-C - Geographical breakdown of exposures	28
440 (1) (b)	Amount of the institution specific countercyclical capital buffer	Table 1: KM1 - Key metrics	9
Indicators of glob	al systemic importance		
441 (1)	Disclosure of the indicators of global systemic importance	N/A	N/A
Credit risk adjustr	ments		
442 (a)	Disclosure of bank's definitions of past due and impaired	5.4 Analysis of past due and impaired exposures	29
442 (b)	Approaches for calculating credit risk adjustments	5 Article 442 CRR - Credit risk adjustments	26
442 (c)	Disclosure of pre-CRM EAD by exposure class	Table 9: EU CRB-B - Total and average net amount of exposures	28
442 (d)	Disclosures of pre-CRM EAD by geography and exposure class	Table 10: EU CRB-C - Geographical breakdown of exposures	28
442 (e)	Disclosures of pre-CRM EAD by industry and exposure class	Table 11: EU CRB-D - Concentration of exposures by counterparty types	
	Disclosures of pre-CRM EAD by residual maturity and	Table 12: EU CRB-E - Maturity of exposures	29

442 (g) 442 (g) (i) 442 (g) (ii) 442 (g) (iii)	Breakdown of impaired, past due, specific and general credit adjustments, and impairment charges for the period, by exposure class or counterparty type	Table 13: EU CR1-A - Credit quality of exposures by exposure class and instrument	29
442 (h)	Impaired, past due exposures, by geographical area, and amounts of specific and general impairment for each geography	Table 15: EU CR1-C - Credit quality of exposures by geography	30
442 (i) 442 (i) (i) 442 (i) (ii) 442 (i) (iii) 442 (i) (iv) 442 (i) (v)	Reconciliation of changes in specific and general credit risk adjustments	5.4 Analysis of past due and impaired exposures	29
442	Specific credit risk adjustments recorded to income statement are disclosed separately	N/A	N/A
Unencumbered	d assets		
443	Disclosures on unencumbered assets	9 Article 443 CRR - Asset encumbrance	38
Use of ECAIs	·		
444 (a)	Names of the ECAIs used in the calculation of Standardised Approach RWAs, and reasons for any changes	Section 7 Article 444 CRR - External credit rating assessment institutions	33
444 (b)	Exposure classes associated with each ECAI	7 Article 444 CRR - External credit rating assessment institutions	33
444 (c)	Explanation of the process for translating external ratings into credit quality steps	Table 18: Credit quality steps and risk-weights	33
444 (d)	Mapping of external rating to credit quality steps	Table 17: Mapping of ECAIs credit assessments to credit quality steps	33
444 (e)	Exposure value pre and post-credit risk mitigation, by credit quality step	Table 20: EU CR5 - Credit risk exposure by risk weight post CCF and CRM	35
Exposure to m	arket risk		
445	Disclosure of position risk, large exposures exceeding limits, FX, settlement and commodities risk	10 Article 445 CRR - Exposure to market risk	40
Operational ris	k		
446	Disclosure of the scope of approaches used to calculate operational risk, discussion of advanced methodology and external factors considered	12 Article 446 CRR - Operational risk	42
Exposure in eq	juities not included in the trading book		
447 (a)	Differentiation of exposures based on objectives	N/A	N/A
447 (b)	Recorded and fair value, and actual prices of exchange traded equity where it differs from fair value	N/A	N/A
447 (c)	Types, nature and amounts of the relevant classes of equity exposures	N/A	N/A
447 (d)	Realised cumulative gains and losses on sales over the period	N/A	N/A
447 (e)	Total unrealised gains/losses, latent revaluation gains/losses, and amounts included within Tier 1 capital	N/A	N/A
Exposure to in	terest rate risk on positions not included in the trading book		
448 (a)	Nature of risk and key assumptions in measurement models	11 Article 447/448 CRR - Equities and interest rate risk in the banking book	41
448 (b)	Variation in earnings or economic value, or other measures used by the bank from upward and downward shocks to interest rates, by currency	N/A	N/A

449	Exposure to securitisations positions	N/A	N/A
443	Exposure to securiusations positions	IN/A	IN/A
Remuneration of	disclosures		
450	Remuneration disclosure regarding remuneration policy and practices	14 Article 450 CRR - Remuneration policy	46
450 (1) (a)	Information concerning the decision-making process used for determining the remuneration policy	14.1 Governance	47
450 (1) (b)	Information on link between pay and performance	14.2 Aligning pay with performance	47
450 (1) (c)	Important design characteristics of the remuneration system	14 Article 450 CRR - Remuneration policy	46
450 (1) (d)	Ratios between fixed and variable remuneration	14.4 Ratio between fixed and variable pay	48
450 (1) (e)	Information on the performance criteria on which the entitlement to shares, options and variable components of remuneration is based	14.6 Deferral policy and vesting criteria	49
450 (1) (f)	Main parameters and rationale for any variable component scheme and any other non-cash benefits	14.7 Variable remuneration of control function staff	49
450 (1) (g)	Aggregate quantitative information on remuneration by business area	Table 31: REM1 - Aggregate remuneration expenditure by business	50
450 (1) (h) 450 (1) (h) (i) 450 (1) (h) (ii) 450 (1) (h) (iii) 450 (1) (h) (iii) 450 (1) (h) (iv) 450 (1) (h) (v)	Aggregate quantitative information on remuneration, broken down by senior staff management and members of staff whose actions have a material impact on the risk profile	Table 32: REM2 - Aggregate remuneration expenditure by remuneration type	50
450 (1) (i)	Number of individuals being remunerated £1 million or more per financial year	14.8 Quantitative disclosures	49
450 (1) (j)	Total remuneration for each member of the management body upon demand from the Member State or competent authority	N/A	N/A
450 (2)	For institutions that are significant in terms of their size, internal organisation and the nature, scope and the complexity of their activities, the quantitative information above shall be made available to the public at the level of members of the management body of the institution	N/A	N/A
Leverage			
451 (1) (a)	Leverage ratio	13 Article 451 CRR - Leverage	43
451 (1) (b)	Breakdown of total exposure measure	Table 29: LR2 - Leverage ratio common disclosure	44
451 (1) (c)	Derecognised fiduciary items	N/A	N/A
451 (1) (d)	Description of the process used to manage the risk of excessive leverage	N/A	N/A
451 (1) (e)	Description of the factors that had an impact on the leverage ratio	13 Article 451 CRR - Leverage	43
Use of the IRB a	approach to credit risk		
452	Risk-weighted exposure under the IRB approach	N/A	N/A

Use of credit i	risk mitigation techniques		
453 (a)	Use of on- and off-balance sheet netting	6.1 ISDA master agreements and netting	31
453 (b)	How collateral valuation is managed	6.2 Collateral valuation and management	31
453 (c)	Description of types of collateral used	N/A	N/A
453 (d)	Types of guarantor and credit derivative counterparty, and their creditworthiness	N/A - BNY Mellon's EMEA entities do not enter into credit derivative transactions	N/A
453 (e)	Disclosure of market or credit risk concentrations within risk mitigation exposures	6.4 Credit concentration risk	32
453 (f)	For exposures under either the Standardised or Foundation IRB approach, disclose the exposure value covered by eligible collateral	N/A	N/A
453 (g)	Exposures covered by guarantees or credit derivatives	Table 16: EU CR3 - Credit risk mitigation techniques - overview	32
Use of the Ad	vanced Measurement Approaches to operational risk		
454	Description of the use of insurance or other risk transfer mechanisms to mitigate operational risk	Pillar 1: standardised approach Pillar 2: self-assessment approach	N/A
Use of interna	l market risk models		
455	Institutions calculating their capital requirements using internal market risk models	N/A	N/A
Commission I	mplementing Regulation (EU) No 1423/2013		
Article 1	Specifies uniform templates for the purposes of disclosure	N/A	N/A
Article 2	Full reconciliation of own funds items to audited financial statements	Table 2: CC2 - Reconciliation of regulatory capital	13
Article 3	Description of the main features of CET1, AT1 and Tier 2 instruments issued (Annex II and III)	Table 7: CCA - Main features of regulatory capital instruments	18
Article 4	Disclosure of nature and amounts of specific items on own funds (Annex IV and V)	Table 6: TLAC1 - Total loss absorbing capacity	17
Article 5	Disclosure of nature and amounts of specific items on own funds during transitional period (Annex VI and VII)	N/A	N/A
Article 6	Entry into force from 31 March 2014	Implemented	N/A
