

Impartial Lottery Process

When a security is subject to a partial redemption, BNY Pershing has procedures to treat you fairly. When an issuer initiates a partial call of securities, the depository holding such securities (typically, the Depository Trust and Clearing Corporation, or DTCC) conducts an impartial, computerized lottery using an incremental random number technique to determine the allocation of called securities to participants for which it holds securities on deposit (including BNY Pershing). Because DTCC's lottery is random and impartial, participants may or may not receive an allocation of securities selected for redemption.

When BNY Pershing is notified that it received an allocation of called securities, BNY Pershing conducts a similar, computer-generated random lottery. The lottery determines the accounts that will be selected and the number of securities in the account that will be redeemed. Allocations are based on the number of trading units held in the account. The probability of any trading unit held by an account being selected as called in a partial call is proportional to the total number of trading units held through BNY Pershing.

Once the lottery is complete, BNY Pershing notifies your firm which accounts have received an allocation. Securities registered in the client's name, either in transit or held in custody, are excluded from the BNY Pershing lottery process.

BNY Pershing initiates the lottery process by identifying the accounts holding the called security, the total par value of the called securities held, and the trading unit of the security. For example (unit of trade = \$25,000):

CLIENT ACCOUNT	PAR VALUE	NUMBER OF TRADING UNITS
ABC-123234	\$100,000	4
DEF-325465	\$75,000	3
EDR-567433	\$150,000	6
EGT-876574	\$50,000	2
EGT-888345	\$25,000	1
FRT-435234	\$25,000	1
FRT-658797	\$75,000	3

In brief, the allocation process involves the following steps:

- The number of trading units held in each account is identified.
- A sequential number is assigned to each trading unit (e.g., account EDR-567433 would be assigned six numbers).
- A random number is generated that will result in one of these trading units being the first unit in the selection process.

- Thereafter, the trading units participating in the allocation are based on an incremental random number technique until the number of trading units allocated to BNY Pershing is exhausted.

Additional Information

- The allocation of called securities is not made on a pro-rata basis. Therefore, it is possible that a client may receive a full or partial redemption of shares held. Conversely, it is also possible that a client may not have any securities selected for redemption.

- When a partial call is deemed favorable to the holders of the called security, BNY Pershing will exclude certain accounts from the lottery. Excluded accounts will include BNY Pershing's proprietary and employee accounts, as well as proprietary and employee accounts of your firm (if BNY Pershing carries and clears those accounts). No allocation will be made to these proprietary and employee accounts until all other client positions at BNY Pershing in such securities have been called. When a partial call is deemed unfavorable to holders of the called security, BNY Pershing will not exclude any accounts from the lottery.

- If the partial call is made at a price above the current market price as captured in BNY Pershing's price reporting system, BNY Pershing will generally categorize the partial call as one that is favorable to the holders of such security. If the partial call is made at a price that is equal to or below the current market price of the security as captured in BNY Pershing's price reporting system, BNY Pershing will generally categorize that call as one that is unfavorable to holders of the security.

- Clients have the right to withdraw uncalled, fully paid securities from BNY Pershing at any time prior to the cutoff date and time established by the issuer, transfer agent and/or depository with respect to the partial call. Clients also have the right to withdraw excess margin securities, provided that the client account is not subject to restriction under Regulation T or that such withdrawal will not cause an under-margined condition.
